

# WOOD & METAL SHINING STAR

Model  
**WM 1305**

## Overall form:

- A tall, freestanding trophy consisting of a black rectangular pedestal with a tall, sculpted gold figure rising from it, topped by a gold star.

## Top element:

- A five-pointed star in polished gold/silver/copper, perched at the very top of the figure.

## Central figure:

- A flowing, ribbon-like gold/silver/copper stem that twists upward in a graceful, wave-like curve, giving a sense of ascent and movement.

## Base and pedestal:

- A square black pedestal provides a stable foundation for the tall sculpture; the top surface is flat to support the figure.

## Materials and finish:

- The star and twisting stem appear to be gold/silver/copper-tone metal with a polished, reflective finish; the pedestal is a dark, semi-gloss material such as wood.

## Mounting:

- The gold/silver/copper stem is mounted securely on the pedestal and culminates in the star at the apex, forming a single, cohesive trophy.

## Style and impression:

- A contemporary, celebratory award with an emphasis on ascent and achievement, conveyed by the rising, spiraling form and the prominent star.

# WOOD & METAL APEX STAR

Model  
**WM 1307**

## **Overall form:**

- A tall, freestanding trophy with a black, square pedestal supporting a sculptural gold figure.

## **Sculpture:**

- A dynamic, wave-like gold stem that twists upward and outward, culminating in a five-pointed star at the top.

## **Base:**

- A solid, rectangular black base with a flat top to anchor the sculpture.

## **Finish and materials:**

- The star and twisting stem are a polished gold-tone metal; the base appears to be a dark, wooden material with a glossy finish.

## **Style and impression:**

- Modern and celebratory, conveying motion and aspiration through the flowing, upward-curving form topped by a star.

# WOOD & METAL ORBITING STAR

Model  
**WM 1310**

## Overall form:

- A tall, gold-toned trophy sculpture mounted on a black square pedestal.

## Central motif:

- A circular medallion with a raised five-point star at its center, surrounded by a surrounding ring that gives a celestial, orbital feel.

## Orbital/ribbon element:

- A sweeping curved arc or crescent extends from the right side of the circle, with small round dots along the inner edge, suggesting motion.

## Laurel accent:

- A gold/silver/copper laurel branch snakes up the left side of the composition, wrapping toward the top and adding a classical touch.

## Base and support:

- The sculpture sits on a solid black rectangular pedestal; the transition from base to sculpture is clean and vertical.

## Finish and materials:

- Bright, polished gold/silver/copper-tone metal for the trophy components; the base appears to be a matte black wooden material.

## Style and impression:

- A contemporary, award-style piece that combines celestial symbolism (star and orbit) with traditional laurels, conveying prestige and achievement.

# WOOD & METAL STARWAVE

Model  
**WM 1313**

## Overall form:

- A tall, freestanding trophy with a gold/silver/copper-toned star perched atop a gracefully curved, ribbon-like stem, mounted on a black rectangular pedestal.

## Top element:

- A classic five-pointed star in polished gold/silver/copper, slightly tilted and attached to the end of the curved stem.

## Central sculpture:

- A slender, flowing stem that twists upward in a wave-like, sculptural form, giving a sense of ascent and movement.

## Connection:

- The star sits at the tip of the curved stem, connected by a small arch or loop that emphasizes the trophy's vertical elegance.

## Base and pedestal:

- A simple, solid black rectangular pedestal that provides a stable, contrasting foundation for the bright gold sculpture.

## Finish and materials:

- The star and stem are a bright, polished gold/silver/copper-tone metal; the pedestal is a matte or satin black wooden material.

## Style and impression:

- Modern, celebratory, with a dynamic, uplifting silhouette that conveys achievement and aspiration.

# WOOD & METAL REGAL WINGS

Model  
**WM 1314**

## Overall form:

- A tall, freestanding trophy mounted on a square black pedestal.

## Central column:

- A cylindrical, dark red with black speckled pattern column, capped at the top and bottom with gold rings.

## Top element:

- A large, clear faceted crystal ball perched atop a short gold stalk.

## Wings:

- Two symmetrical, curved gold wings rise from near the middle, framing the crystal ball and extending upward and outward with layered feather-like segments.

## Hands/ornament:

- A gold-toned clasp or pair of hands appear to grip the column just below the crystal ball, integrating the wings with the central shaft.

## Base and supports:

- A black rectangular base provides stability, with a gold-toned collar at the top where the column rests.

## Finish and materials:

- Polished gold-tone metal for the wings, hands, and stalk accents; a red/black speckled acrylic or resin column; a glossy black pedestal.

## Style and impression:

- Regal and heraldic, combining celestial flight (wings and crystal) with a solid, grounded pedestal to convey prestige and achievement.

# WOOD & METAL UNITY

Model  
**WM 1315**

## Overall form:

- A trophy mounted on a black square pedestal. The central sculpture features two large gold/silver/copper wings, clasped hands, and a crystal orb, creating a dramatic, celebratory centerpiece.

## Wings:

- Symmetrical, curved gold/silver/copper wings with multiple feather-like segments. They rise upward and outward, forming a protective, opening embrace around the central elements.

## Hands and clasp:

- Two gold-toned hands meet at the center, appearing to clasp around a vertical stem, suggesting a handshake or teamwork motif.

## Central orb:

- A clear, faceted crystal ball perched atop a short gold stalk held by the clasped hands, catching light and creating a sparkling focal point.

## Pedestal and base:

- A stepped gold platform sits atop a solid black rectangular pedestal, providing a sturdy foundation and contrast to the bright sculpture.

## Finish and materials:

- Polished gold-tone metal for the wings, hands, and stalk; a clear crystal ball; a glossy black base.

## Style and impression:

- Regal and symbolic, conveying achievement, collaboration, and ascent.

# WOOD & METAL TRIPLE STAR

Model  
**WM 1317**

## Overall form:

- A freestanding trophy mounted on a black square pedestal.

## Central sculpture:

- A gold-toned stem that rises from a textured gold cap on the pedestal and branches upward in a curved, plant-like shape to support three stars.

## Stars:

- One large star sits at the top; two smaller stars are positioned along the curved branch, creating a three-star motif.

## Base details:

- The stem emerges from a rounded gold cap with a subtle leaf-like pattern, sitting on a glossy black rectangular pedestal.

## Finish and materials:

- Polished gold-tone metal for the stars and stem; the pedestal is black (likely wood or resin) with a glossy finish.

## Style and impression:

- Modern, celebratory, with a regal, uplifting silhouette emphasizing a trio of stars and collaboration.

# WOOD & METAL WINGS OF TRIUMPH

Model  
**WM 1321**

## Overall form:

- A freestanding trophy featuring a double gold/silver/copper wing motif mounted on a black square pedestal.

## Central frame:

- A large, gold/silver/copper V-shaped column rises from the pedestal and splits into two symmetrical wings that curve upward and outward.

## Wings:

- Each wing is highly stylized with layered feather-like segments that taper toward the tips, giving a crisp, aerodynamic silhouette.

## Connection and spacing:

- The wings are connected at the inner curve of the central frame, creating a dramatic negative space between them.

## Base and pedestal:

- A solid black rectangular pedestal with clean lines and a stepped profile at the base adds a strong, stable foundation.

## Finish and materials:

- Polished gold/silver/copper-tone metal for the wings and central frame; a matte or glossy black pedestal (likely wood or resin).

## Style and impression:

- Modern, elegant, and aspirational—conveys flight, ascent, and achievement.

# WOOD & METAL CELESTIAL WING

Model  
**WM 1322**

## Overall form:

- A tall, freestanding trophy with a gold/silver/copper-toned sculpture mounted on a black square pedestal.

## Top element:

- A large five-pointed star sits at the apex of the sculpture.

## Wings:

- Symmetrical wing shapes extend outward from near the top, featuring layered feather-like ridges that create a dramatic, winged frame.

## Central column:

- A narrow, decorative column runs beneath the star, with raised star motifs along its length and a ribbed, textured section toward the lower portion.

## Connection and silhouette:

- The wings and central stem form a cohesive, upward-curving silhouette that emphasizes ascent and achievement.

## Base and pedestal:

- A solid black rectangular pedestal provides a sturdy, contrasting foundation for the bright gold/silver/copper sculpture.

## Finish and materials:

- Polished gold/silver/copper-tone metal for the sculpture; matte or satin black finish for the pedestal.

## Style and impression:

- Regal and ceremonial, combining celestial star symbolism with heraldic wing motifs to convey honor and triumph.

# WOOD & METAL TRIPLE STAR

Model  
**WM 1323**

## Overall form:

- A tall, freestanding trophy mounted on a black rectangular pedestal.

## Top motif:

- A gold crown with five rounded points, each ending in a small ball.

## Main body:

- A tapered, conical column in polished gold/silver/copper, wrapped by several diagonal, ribbon-like bands that sweep around the shaft.

## Connection:

- The crown sits atop the spiral-wrapped column, forming a single, cohesive sculpture.

## Base and pedestal:

- A solid black pedestal with a clean, squared profile, providing a sturdy foundation.

## Finish and materials:

- Bright, polished gold/silver/copper-tone metal for the crown and column; a matte or satin black pedestal.

## Style and impression:

Regal and ceremonial, with a dynamic spiral accent that conveys elevation and achievement.
