

WOOD & METAL (WM)

WOOD & METAL CRYSTAL ORB

Model
WM 9101

Overall composition:

- A trophy-style sculpture with three main elements stacked vertically: a large five-point star at the top, a curved gold support, a faceted crystal centerpiece, and a chunky base holding a decorative plaque.

Top element:

- A prominent gold-tone five-point star, oriented with one point upward. The star appears three-dimensional with beveled facets.

Support structure:

- A graceful, curved gold arc rising from the central column and looping to hold the star in place. The arc has a small knob near its inner curve.

Central feature:

- A faceted, clear crystal-like orb (gem) mounted near the top of a ribbed, cylindrical column. The orb sits within a gold collar at the top of the column.

Column/base transition:

- A stacked, segmented cylindrical column in a metallic finish (primarily silver/steel tone) with horizontal grooves. The column sits on a gold-toned collar that connects to a broader, dark base.

Base:

- A heavy, dark rectangular base with a gold-accented podium area. On the front, there is a plaque area framed by gold detailing, suggesting an inscription area (content not read).

Materials and finish:

- The piece uses gold-tone metal for the star and arc, a silver/steel-toned ribbed column, a clear crystal-like centerpiece, and a dark, glossy base with gold trim.

WOOD & METAL CONTEMPORARY

Model
WM 9102

Overall composition:

- A trophy-style award featuring a prominent gold star perched atop a curvy purple pedestal.

Star sculpture:

- A three-dimensional gold-tone star with smooth, beveled edges. It sits on a small gold stem or mounting piece that attaches to the pedestal.

Pedestal:

- A tall, sculpted purple column with a slightly curved silhouette, giving a modern, architectural look. The front face hosts the yellow plaque, while the sides taper in a bit for a dynamic profile.

Front plaque:

- A vertical, bright yellow panel attached to the purple pedestal. It carries a logo near the top and a block of text below, though the content isn't read here.

Materials and finish:

- The star appears metallic gold with a polished finish; the pedestal is a glossy purple surface (likely wood or resin); the plaque looks like a glossy yellow panel, possibly plastic or enamel-coated.

AG
₹ 415

WOOD & METAL GOLD STATUE

Model
WM 9103

Overall form:

- A trophy with a gold-tone sculpted figure mounted on a tall black pedestal topped by a pink crystal centerpiece. The combination creates a vertical ceremonial silhouette.

Statue:

- An elongated, abstract human figure in a graceful pose, standing upright with one arm raised high to support the crystal. The other arm rests along the body. The figure has smooth, sculpted curves and a stylized, modern look.

Crystal top:

- A faceted pink crystal perched above the raised hand, set in a small gold-toned mount or cup.

Pedestal:

- A tall, glossy black base with a square cross-section and a flat top that supports the figure. The top portion includes a yellow/orange plaque on the front face.

Materials and finish:

- The figure is gold-tone metal with a polished finish; the crystal is translucent pink; the pedestal is dark, glossy material; the plaque is a colored panel (likely metal or acrylic) with a printed/engraved design.

Style and impression:

- A contemporary, elegant award with a focal crystal and a sculptural figure, conveying celebration and achievement.

₹ 1010

WOOD & METAL OPAL GLOBE

Model
WM 9104

Overall form:

- A tall trophy consisting of a red, glossy cylindrical column mounted on a black rectangular base, with gold accents and a white globe on top.

Top element:

- A smooth, opaque white globe seated in a gold-colored collar, forming the pinnacle of the trophy.

Midsection and accents:

- The red column features gold bands at the transition points near the top and bottom, adding a ceremonial contrast to the glossy red surface.

Base:

- A solid black base that supports the column; the front face holds a gold foil framed by the base.

Materials and finish:

- The globe appears to be glass, the column is lacquered plastic, the bands and collar are metal with a polished gold finish, and the base is a matte or polished black material.

Style and impression:

- The piece has a contemporary, elegant look with a bold color contrast (red, black, gold, white) and a prominent globe topper.

A-12"
₹ 1485

WOOD & METAL CRYSTAL GLOBE

Model
WM 9105

Overall form:

- A tall trophy with a clear, faceted crystal globe on top, mounted on a glossy red column with gold accents, and set on a two-piece base that includes a front plaque.

Top element:

- A large, multi-faceted crystal globe, acting as the pinnacle of the trophy.

Column:

- A tapered, glossy red shaft with gold hardware. There are gold bands at the upper and lower transitions and a gold collar near the top, adding ceremonial contrast.

Base:

- A light-colored (gray) pedestal supporting a black lower base. The front of the lower base features a gold plaque for inscription (content not read here).

Materials and finish:

- The globe is crystal or clear acrylic; the column is red lacquered material (wood or resin); the gold elements are metal with a polished finish; the base appears as a combination of gray pedestal and black platform.

Style and impression:

- A stately, contemporary trophy with a bold color contrast (red, gold, black) and a prominent crystal top.

A 12,75"
₹ 1540

WOOD & METAL GOLD SHIELD

Model
WM 9106

Overall shape and presentation:

- A shield-shaped plaque mounted on a light wood base. The shield has a tall, narrow silhouette with curved edges and a dark border framing a gold-toned central plate.

Top accent:

- A bright golden star attached near the top-right corner of the shield, giving a decorative, celebratory touch.

Central plate:

- A brushed gold panel set inside the dark border. The panel has a vertical emphasis and a slightly curved outline that follows the shield shape.

Base:

- A light wood pedestal with a stepped, rectangular profile that supports the shield. The base appears solid and provides stable support for the plaque.

Materials and finish:

- The shield's inner plate is metallic gold with a brushed texture; the border around it is dark, possibly black or dark gray; the star is a glossy green; the base is natural wood with a smooth finish.

Style and impression:

- This is a ceremonial, contemporary award piece combining metal, a bold color accent (green star), and a natural wood base for a formal yet modern look.

WOOD & METAL STAR-LIT FLAME

Model
WM 9107

Overall form:

- A tall, flame-shaped plaque with a blue outer frame surrounding a gold central plate. The flame silhouette rises vertically, giving a ceremonial trophy-like profile.

Outer frame:

- A deep blue flame outline with a slightly textured or metallic finish. The edges are defined and there are light-colored star shapes embedded along the sides, contributing a celebratory motif.

Central plate:

- A vertically oriented gold panel with a brushed texture. It sits inside the blue frame and forms the main inscription area. The top area includes a small logo or emblem, followed by lines of text, though I'm not reading the content here.

Base:

- A light wood pedestal supporting the flame plaque, with a front-facing gold plaque mounted on the base for inscriptions (the exact text on this plaque isn't read here).

Materials and finish:

- The central plate is metallic gold with a brushed finish; the outer frame is blue (likely a resin or metal with a colored coating); stars appear as light-colored accents; the base is natural wood with a polished surface.

A H⁺
₹ 1095

WOOD & METAL GLOBE RING

Model
WM 9108

Overall form:

- A trophy featuring a large circular wooden ring with a central opening, housing a globe at its top-center. The circle is segmented near the top by gold-toned elements, giving a crest-like appearance. A sturdy wooden base supports the wood and a gold-toned front plaque.

Central globe and support:

- A clear globe sits within the central opening, resting on a small gold collar attached to the inner edge of the ring supporting stem.

Ring and segmentation:

- The wooden ring shows three dark, narrow divisions or gaps at the top, creating a tri-split look that frames the gold cap and the globe.

Base and plaque:

- A light wood pedestal supports the circular ring. The front of the base features a gold-toned plaque mounted in a recessed area, intended for inscription.

Materials and finish:

- The main material is light wood for the ring and base; metal accents are gold-toned for the cap, globe support, and plaque frame; the globe is clear glass or crystal.

Style and impression:

- A contemporary, globe-themed trophy with a warm wood tone, metallic gold accents, and a focal crystal globe above a formal front plaque.

WOOD & METAL GOLD STAR

Model
WM 9110

Overall form:

- A desktop trophy consisting of a dark rectangular outer frame with a central vertical opening. Inside the opening, a gold-tone star sits atop a slender gold stem, which rises from a small circular base and is positioned within the frame. The entire centerpiece rests on a larger light wood base that features a gold-toned fin on the front.

Outer frame:

- A tall, dark frame with a slightly beveled look. The edges show small circular details and there are lighter corner caps at the inner opening, giving a layered, architectural effect.

Central motif:

- A five-pointed gold star mounted on a slim stem. The star is the focal point, elevated within the framed opening.

Inner opening and support:

- The star and its stem are anchored to a small round pedestal inside the frame, which provides support before the figure sits on the base.

Base and plaque:

- A light wood pedestal supports the framed centerpiece. The front of the wooden base holds a gold-toned plaque, intended for inscription.

Materials and finish:

- The star and stem are gold-tone metal with a polished finish; the frame is dark metal or coated material; the inner corner caps are metallic; the base is light wood; the plaque is gold-tone metal.

A 8 1/2"
₹ 990

WOOD & METAL ELEGANT STAR

Model
WM 9111

Overall form:

- A trophy with a tall, dark rectangular frame that encloses a single gold-tone star mounted on a curved stem, all perched on a light-colored base with a gold plaque at the front.

Outer frame:

- A slim, dark, rectangular enclosure with a slightly beveled edge. The frame creates a window-like opening to showcase the central star element.

Central centerpiece:

- A three-dimensional gold star perched on a slender curved gold stem that rises from a small round base inside the inner opening. The stem curves gracefully upward so the star appears to float within the frame.

Base and plaque:

- The framed centerpiece sits atop a light wood pedestal. The front of the pedestal features a gold-toned plaque, which holds logos and an inscription area.

Materials and finish:

- The star and stem are polished gold-tone metal; the frame is dark metal or coated plastic; the base is light wood; the plaque is gold-toned metal.

Style and impression:

- A modern, prestige trophy with a prominent gold star as the focal point, framed by a dark surrounding structure and supported by a natural-toned base.

A 8 1/2"
₹ 990

WOOD & METAL ELEGANT STAR

Model
WM 9114

Overall form:

- A compact trophy comprised of a light-colored wooden panel with a gold-toned plaque mounted on its front, set against a dark vertical backing. A large yellow star is positioned on the dark backdrop above the panel, adding a prominent decorative element.

Front plaque panel:

- A vertical gold-toned plate with a brushed texture. It is bordered by a light frame that defines the panel's edges. The panel is oriented for portrait viewing.

Star and backdrop:

- A bright yellow five-point star sits on a dark backdrop behind the plaque, contributing a bold ceremonial cue to the overall composition.

Base:

- The light wood panel appears to be mounted on a broader dark base or is part of a larger stand; the exact lower portion is not fully visible, but the plaque is clearly intended for inscription and display.

Materials and finish:

- The plaque plate has a brushed gold finish; the surrounding frame is light wood; the crest is red with a white emblem; the star is a solid yellow material; the backdrop is dark, providing contrast.

Style and impression:

- A contemporary award presentation with a strong gold-and-color contrast, featuring a prominent star motif above an ornate gold plaque.

A 10"
₹ 1180

WOOD & METAL STAR-EMBLEM

Model
WM 9115

Overall form:

- A trophy with a tall, upright panel mounted in a light wood frame, set on a two-tone base. A bright yellow star sits against a black section at the lower portion, angled outward for emphasis.

Panel and frame:

- A large rectangular panel finished in a gold foil, framed by a light wood border. The panel is oriented vertically and appears slightly angled due to perspective.

Star element:

- A golden five-point star positioned at the lower front of the black portion, leaning diagonally as if anchored to the base and facing outward.

Base:

- A light wooden pedestal with a simple, stepped profile that supports the framed panel. The base provides a sturdy, ceremonial foundation.

Materials and finish:

- The panel has a metallic gold look; the frame and base use natural/light wood; the lower portion is black, providing strong contrast with the gold panel; the star is a bright, solid yellow material.

Style and impression:

- A contemporary award with bold gold and natural wood tones, highlighted by the prominent star motif at the base.

A-1015
₹ 1140

WOOD & METAL ARCH-WINDOW

Model
WM 9116

Overall form:

- A vertical wooden plaque with rounded top corners. In the lower central area there is an arched window that reveals a gold-tone trophy statue inside.

Central motif:

- A small, gold-tone figure stands inside the arch, mounted on a circular base, with its arms raised overhead to support or frame a decorative element at the top.

Arch window:

- The opening is a smooth, rounded arch that frames the golden figure, creating a focal point within the wood.

Base and support:

- The plaque rests on a light-colored wooden base, giving the entire piece a two-tiered presentation.

Materials and finish:

- The main plaque is light wood; the interior statue is polished gold-tone metal; the window frame is carved from the same wood; the embedded figure sits on a small circular pedestal.

Style and impression:

- A ceremonial, prestige-style award with a prominent gold figure set within a wooden frame, presenting a formal and commemorative look.

₹ 1155

WOOD & METAL ARCHWAY STAR

Model
WM 9117

Overall form:

- A vertical wooden plaque with rounded top corners, mounted on a base. In the lower central area, there is an arched window that reveals a gold-tone trophy inside. The plaque presents as a single, tall wooden panel flanked by a surrounding frame, with a two-tone impression from the base.

Front face:

- The wood has a natural light finish. The arched opening is a smooth, symmetrical cutout that exposes the trophy within.

Trophy inside the arch:

- A gold-tone sculpture featuring multiple star shapes rising from a small pedestal, arranged in a dynamic, upward-spreading composition.

Base:

- A light wood base supports the plaque and provides a stable foundation for display.

Materials and finish:

- The main plaque is light wood; the inner trophy is polished gold-tone metal; the logo is printed or engraved on the wood; the arch window is carved from the plaque itself.

Style and impression:

- A ceremonial, prestige-style award with a prominent gold star motif showcased within a wooden frame, giving a formal and commemorative look.

₹ 1390

WOOD & METAL DIAMOND CROWN

Model
WM 9118

Overall form:

- A tall trophy featuring a stylized gold human figure standing on a circular base with arms raised overhead to support a large clear gemstone at the top. The gemstone is diamond-cut and sits on a small gold cradle, giving the impression that the figure is lifting or presenting it.

Central figure:

- A slender, elongated gold-tone sculpture of a person, standing upright with both arms raised high above the head. The figure's pose is confident and ceremonial.

Gemstone and cradle:

- A large, faceted, clear gemstone (crystal-like) perched atop a small gold platform or cradle held by the figure's raised arms.

Base and plaque:

- The figure stands on a round or slightly tiered gold base that sits atop a larger black pedestal.

Materials and finish:

- The statue is a polished gold-tone metal; the gemstone is transparent, faceted crystal or glass; the base is black with a gold plaque.

Style and impression:

- A dramatic, award-style trophy with a prominent gemstone centerpiece and a heroic, upward-reaching figure, combining metallic gold with a dark, solid base for contrast.

A 12.75"
₹ 2100

WOOD & METAL WORLD REACH

Model
WM 9119

Overall form:

- A tall trophy featuring a gold-tone human figure lifting a large globe above its head. The figure stands on a small gold base, which sits atop a black pedestal with a front gold plaque for inscription.

Figure:

- A stylized, elongated gold sculpture of a person with arms raised straight overhead to support the globe. The pose conveys upward energy and triumph.

Globe:

- A spherical, translucent or metallic globe with continents suggested on its surface, perched above the figure's raised hands.

Cradle and arms:

- The globe is cradled by the raised arms of the figure, creating the impression that the world is being held aloft.

Base and plaque:

- A two-tier base system—a small gold pedestal for the figure and a larger black base with a gold foil on the front.

Materials and finish:

- The figure is polished gold-tone metal; the globe is a silver/clear-toned material; the base is black with a gold plate.

Style and impression:

- A ceremonial, prestige trophy with a strong global theme and a heroic, uplifting stance.

A 12.75"
₹ 2140

WOOD & METAL STAR PEAK

Model
WM 9121

Overall form:

- A trophy featuring a bright yellow star perched atop a tall, glossy black tapered column, which rests on a gold-colored pedestal connected to a dark base with a front plaque.

Top star:

- A three-dimensional, five-point yellow star mounted on a small gold cap that sits at the top of the column.

Stem:

- A long, slender black column that tapers slightly toward the base, giving the piece a tall, vertical emphasis.

Pedestal and transition:

- A gold-toned collar or foot under the star area connects the star to the black column, creating a two-tone transition.

Base and plaque:

- A dark, square base supports the column. The front features a golden foil inset into the base, designed for inscription.

Materials and finish:

- The star appears to be a glossy yellow plastic or similar material; the column is a dark material (likely plastic or metal); the gold sections are metallic-looking; the plaque is gold-toned.

Style and impression:

- A bold, modern award with a prominent star motif set on a two-tone black-and-gold pedestal, conveying celebration and prestige.

WOOD & METAL STAR-FRONT

Model
WM 9122

Overall form:

- A trophy on a black pedestal with a tall central body. A gold-toned shield-shaped plaque is mounted on the front of the column, and a decorative gold star sits atop the assembly. The base is broader and darker, providing a stable foundation.

Top ornament:

- A prominent gold star with multiple points, mounted on a small gold cap or stem at the very top.

Central plaque:

- A vertically oriented, shield-like gold plaque affixed to the front of the main column.

Column and integration:

- The black column rises behind the plaque, with a subtle transition piece (a gold collar) where the plaque meets the base, giving a two-tone effect.

Base:

- A large, matte black base supports the entire trophy, with a narrow gold ring separating the base from the column.

Materials and Finish:

- The star and the shield plaque are gold-toned; the column and base are black, likely plastic or metal; the plaque has a brushed texture.

Style and impression:

- A dramatic, prestige trophy featuring a star motif atop a sleek two-tone pedestal and a gold shield plaque.

WOOD & METAL ELEVATED STAR

Model
WM 9123

Overall form:

- A tall trophy with a broad black base and a slender black column supporting a front-facing gold shield plaque; a gold star sits atop the assembly.

Top ornament:

- A five-point gold star mounted on a small gold cap at the very top, giving a prominent, crown-like feature.

Front plaque:

- A vertically oriented, shield-shaped gold plaque affixed to the front of the main column. The plaque has a brushed gold finish and a logo near the top region, followed by text area beneath.

Column and transition:

- A dark black column rises behind the plaque, with a gold accent ring or collar where the plaque meets the column, creating a two-tone transition.

Base:

- A large, dark pedestal at the bottom provides a sturdy foundation, with the shield plaque mounted close to its upper portion.

Materials and finish:

- The star and shield plaque are gold-toned, the column and base are black, and the plaque has a brushed texture.

Style and impression:

- A contemporary, prestige trophy with a strong star motif atop a black-and-gold two-tone presentation.

WOOD & METAL STAR LAUREL

Model
WM 9125

Overall form:

- A tall, slender wooden plaque with a natural light finish and a rounded top edge. A circular black badge with a gold emblem is attached near the lower portion.

Middle portion:

- A vertical block of engraved text spaced into several lines.

Circular badge:

- A round, black plate affixed to the wood, featuring a gold star surrounded by a gold laurel wreath.

Base:

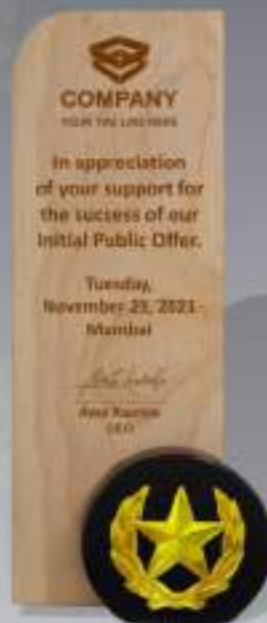

- The plaque appears to stand upright, with the badge occupying the lower portion; no separate stand or base is prominently visible beyond the plaque itself.

Materials and finish:

- The wood has a smooth, light, natural grain; the engraved text is darker brown; the circular badge is black with a bright gold emblem.

Style and impression:

- A formal, ceremonial award plaque with a modern two-tone contrast (light wood and dark badge) and a prominent gold star motif on the badge.

A 10⁴

WOOD & METAL ROYAL CROWN

Model
WM 9126

Overall form:

- A tall, vertical wooden plaque with a natural light finish. The top edge and corners show gentle rounding, and the left side near the top has a slightly curved contour.

Circular badge:

- A circular black badge with a gold emblem (a crown) is mounted at the lower right portion of the plaque, overlapping the wood surface.

Base/standing aspect:

- The plaque is freestanding in portrait orientation, with the circular badge adding a three-dimensional element toward the lower edge.

Materials and finish:

- The base wood is light-toned with a smooth grain; the engraved areas are darker due to the burn/etch; the badge is a glossy black disk with a gold crown motif.

Style and impression:

- A formal, corporate-style recognition plaque with a two-tone contrast (light wood and dark badge) and a prominent crown emblem accent at the lower corner.

WOOD & METAL STAR ASCEND

Model
WM 9128

Overall form:

- A tall, multi-block wooden award/trophy composed of stacked rectangular blocks. A gold star is affixed to the uppermost block, giving a prominent crown feature.

Top ornament:

- A gold-toned five-point star mounted near the center of the top wood block's front face.

Upper block:

- A smooth, light-colored wooden block forming the crown of the trophy; the star sits on its front surface.

Middle block:

- A larger wooden block beneath the top piece, featuring a front surface that likely holds an engraved or printed inscription area. The block sits flush with the blocks above and below.

Lower block and transition:

- Another wood section below the middle block creating a stacked, tiered look; there may be subtle seams where blocks meet, emphasizing the stacked design.

Base and branding:

- A base section at the very bottom, including a smaller plaque or base plate. A broader base provides stability.

Materials and finish:

- Light, natural wood with visible grain; the star is gold-toned, likely metal or metal-coated; any inscriptions or logos are darker due to engraving/printing.

Style and impression:

- A formal, business-oriented award with a clear star motif, presented in a clean, tiered wooden design.

WOOD & METAL WINGS OF ACHIEVEMENT

Model
WM 9129

Overall form:

- A tall, two-block wooden award with a light natural finish. The upper block is taller and features a prominent gilt eagle affixed to its front, while a narrow dark seam runs horizontally between the upper and lower blocks.

Top ornament:

- A large, gold-toned eagle in relief, wings spread wide as if in flight, mounted on the front of the upper block.

Middle/upper block:

- A smooth wood surface serving as the "crown" of the trophy, with the eagle mounted prominently to attract attention.

Lower block:

- A slightly shorter wooden section beneath the seam, containing engraved or carved inscription area on its front surface. Decorative flourishes flank the text area.

Base/foot:

- A separate wooden base block at the bottom, featuring a carved or engraved eagle motif on its front face, providing a decorative foundation.

Materials and finish:

- Light-colored wood for the main structure; a shiny gold-tone eagle sculpture; darker accents where the seam and base meet; engraved details darker than the surrounding wood.

Style and impression:

- A ceremonial, prestigious award with a bold eagle motif, combining natural wood warmth with a striking gold emblem for emphasis.

₹ 1370

WOOD & METAL GRACEFUL

Model
WM 9140

Overall form:

- A tall trophy featuring a slender, abstract gold figure standing atop a black rectangular base. The figure is elongated and sculptural, with a graceful, curved posture.

Top ornament:

- A pink, gem-like crown or cap sits atop the figure's head, creating a striking contrast with the gold body.

Figure details:

- The figure is highly stylized, with smooth, flowing curves and a dynamic, upward-reaching gesture that suggests movement or ascension.

Base and plaque:

- The figure rests on a small pedestal that connects to a larger black base. A gold plaque is mounted on the front of the base, featuring a logo near the top and space below for inscription.

Materials and finish:

- The statue appears in polished gold-tone metal; the pink crown is translucent or faceted, giving a jewel-like effect; the base is dark, likely black plastic or metal; the plaque is gold-toned with a darker engraved area.

Style and impression:

- A contemporary, ceremonial award with an emphasis on elegance and movement, combining a radiant gold figure with a colorful crown and a two-tone black/gold presentation.

A 12.75"
₹ 1335

WOOD & METAL WINGED ANGELIC

Model
WM 9141

Overall form:

- A tall display trophy encased in a rectangular black frame with an open front, standing on a wide base.

Central figure:

- A gold-tone statue of a winged angelic figure, positioned upright with wings fully spread to the sides. The figure appears to stand on a small pedestal within the frame.

Top element:

- A large, diamond-cut crystal or gem sits atop a short gold stem above the figure's head, creating a crown-like focal point.

Backdrop and supports:

- A circular ring or hoop-like feature sits behind the figure, contributing to a layered, ceremonial look.

Base and plaque:

- The display sits on a black base; a rectangular plaque with a gold border is mounted on the front of the base, intended for inscription.

Materials and finish:

- The statue and top gem are gold-toned metal (the gem appears crystal), the display frame and base are black, and the plaque has a brushed or polished gold appearance with a darker border.

Style and impression:

- A prestigious, gallery-like trophy with a prominent winged figure, a diamond crown motif, and a two-tone black-and-gold presentation.

A-135[®]
₹ 2080

WOOD & METAL APEX STAR

Model
WM 9142

Overall form:

- Tall trophy mounted on a black rectangular base, featuring a central gold sculpture and a front gold plaque on the base.

Central sculpture:

- A slender, abstract gold figure stands upright with arms raised in an arc, forming a graceful loop around a five-point star perched at the top.

Top ornament:

- A prominent five-point gold star sits above the looping arms, serving as the crown of the piece.

Base and plaque:

- The sculpture sits on a pedestal that leads to a black base; a gold plaque with a darker border is mounted on the front of the base, designed for inscriptions. There is also a small logo area at the top of the plaque.

Materials and finish:

- The sculpture and star are gold-toned metal with a polished finish; the base is black; the plaque is gold-toned with a darker border and brushed texture.

Style and impression:

- A ceremonial, contemporary award with a dynamic upward motion and a clear star motif, emphasized by the black-and-gold two-tone presentation.

A 15.75"

₹ 1265

WOOD & METAL CELESTIAL

Model
WM 9143

Overall form:

- A tall trophy sculpture mounted on a black rectangular base, with a gold-toned figure as the focal point and a decorative top ornament.

Central figure:

- A sleek, abstract gold statue of a human form standing upright, with fluid, curving contours and a dynamic posture that suggests ascent or reach.

Top ornament:

- A gold, star-like or geometric crown above the figure's raised portion, creating a bright focal point at the apex.

Base and plaque:

- The figure sits on a small pedestal that sits atop a black base; a front-facing plaque sits on the base with a gold border and a logo area at the top, intended for inscription.

Materials and finish:

- The sculpture and crown are gold-toned metal with a polished surface; the base is black (likely plastic or metal); the plaque is gold-toned with a darker border.

Style and impression:

- A contemporary, celebratory award emphasizing aspiration and achievement through a stylized human form reaching toward a star.

WOOD & METAL LUMINARY STAR

Model
WM 9144

Overall form:

- A tall trophy mounted on a black rectangular base, featuring a gold-toned figure as the central element and a prominent star at the top.

Central figure:

- A sleek, abstract gold figure with an elongated body and outstretched arms, raised as if reaching upward and curving around the star at the apex.

Top ornament:

- A large gold star perched above the figure, serving as the crown of the piece.

Surrounding accents:

- A cluster of smaller gold stars arranged along one side of the figure, creating a dynamic, celebratory backdrop.

Base and plaque:

- The gold figure rests on a small pedestal integrated into the black base; a front-facing plaque with gold border is mounted on the base for inscription.

Materials and finish:

- The sculpture and stars are gold-toned metal with a polished finish; the base is black; the plaque features a gold surface with a darker border.

Style and impression:

- A contemporary, award-style sculpture emphasizing ascent, stars, and celebration, with a strong black-and-gold two-tone look.

WOOD & METAL CRICKET-BATSMAN

Model
WM 9145

Overall form:

- A trophy mounted on a black polygonal base, featuring a tall gold-toned sculpture of a cricket batsman encircled by a circular ring frame.

Central figure:

- A detailed gold cricket batsman posed in mid-swing, with bat raised above the shoulder, wearing protective gear.

Circular frame:

- A large, multi-ring circular motif behind and around the batsman, forming a dynamic backdrop.

Ball motifs:

- A cricket ball appears integrated into the ring design (one visible within the ring area, contributing to the theme).

Base and plaque:

- The sculpture sits on a small pedestal that rests on a black base; a front-facing plaque with a gold border is mounted on the base for inscriptions.

Materials and finish:

- The statue, rings, and ball are gold-toned metal with a polished or brushed finish; the base is black.

Style and impression:

- A sport-centered, ceremonial trophy with a bold cricket motif, combining a striking gold figure and circular frame on a black/sophisticated two-tone base.

₹ 1165

WOOD & METAL ELITE TOWER

Model
WM 9146

Overall form:

- A tall trophy mounted on a black block base, with a gold-toned center piece rising from the base to a star motif at the top.

Central sculpture:

- A slender gold pillar or cone that supports a large star assembly near the crown. The star appears to be two overlapping five-point shapes, creating a bold, dimensional starburst.

Top ornament:

- A prominent gold star formation at the very top, formed by an outer star and an inner, offset star, giving a layered star effect.

Base and plaque:

- The pedestal sits on a black base; a front-facing gold plaque is mounted on the base.

Materials and finish:

- The statue and star are gold-toned metal with a polished appearance; the base is black (likely plastic or metal); the plaque is gold-toned with a darker border.

Style and impression:

- A contemporary, ceremonial trophy with a pronounced star motif, combining a sleek gold sculpture with a strong black/gold contrast.

AH
₹ 2025

WOOD & METAL CRICKET-SERIES

Model
WM 9147

Overall form:

- A tall trophy with a black rectangular base, supporting a gold-toned sculpture that rises to a circular ring at the top.

Central figure:

- A stylized gold figure stands upright with arms raised, grasping the circular ring above their head. The figure has a solid torso and head, with a simplified, athletic silhouette.

Additional details:

- The ring appears to be anchored by the figure and includes a small round element to one side, contributing to the trophy's mechanical/modern aesthetic.

Base and plaque:

- The figure rests on a small pedestal atop a black base. A front-facing plaque with a gold border is mounted on the base for inscription. There is also a logo area visible near the top portion of the plaque.

Materials and finish:

- The sculpture, ring, and internal diagonal piece are all gold-toned metal with a polished finish.

Style and impression:

- A contemporary, achievement-oriented trophy with a strong emphasis on upward movement, rings, and a bold two-tone black-and-gold presentation.

₹ 1350

WOOD & METAL STAR ARC

Model
WM 9148

Overall form:

- A trophy mounted on a black rectangular base featuring a tall, gold/silver/copper-toned sculpture that rises to a pointed star at the top.

Central sculpture:

- A slender, curved gold column that twists upward, forming a graceful arc. Near the upper portion, there is a circular, ring-like cutout containing a small spherical element, giving a subtle focal point inside the curve.

Top ornament:

- A prominent five-point gold star perched at the apex of the curved stem.

Decorative details:

- The lower portion of the curved stem is adorned with delicate, scroll-like floral or leaf engravings, adding ornamental texture.

Base and plaque:

- The sculpture sits on a small pedestal atop a black base. A front-facing plaque with a gold border is mounted on the base for inscription. A small logo area is visible near the top portion of the plaque.

Materials and finish:

- The entire sculpture and star are gold-toned metal with a polished finish; the base is black.

Style and impression:

- A contemporary yet ornate trophy that blends a dynamic upward arc with star imagery and decorative reliefs, presented in a two-tone black-and-gold palette.

₹ 1765

WOOD & METAL STAR CASCADE

Model
WM 9149

Overall form:

- A trophy mounted on a black rectangular base, featuring a tall gold/silver/copper-toned center piece that rises to a prominent star at the very top.

Central sculpture:

- A curved, tapering gold column that ascends gracefully; the column is adorned with multiple star motifs along its length, creating a star-filled silhouette.

Top ornament:

- A large gold star sits at the apex, forming the focal point of the piece.

Star arrangement:

- Additional stars are positioned around the upper portion of the sculpture, giving a layered, crown-like effect behind and beside the main star.

Base and plaque:

- The sculpture sits on a small pedestal atop the black base; a front-facing gold-bordered plaque is mounted on the base for inscription. A small logo area is visible on the plaque.

Materials and finish:

- The sculpture and stars are gold-toned metal with a polished finish.

Style and impression:

- A ceremonial, star-centric trophy with a dynamic upward lift.

WOOD & METAL PLANETARY PRESTIGE

Model
WM 9153

Overall form:

- A trophy mounted on a black rectangular base, with a tall gold-toned centerpiece that supports a blue-green globe at the top.

Central sculpture:

- A slender, tapered gold column rising from a flared foot, giving a graceful, vertical silhouette. The column sits on a small pedestal that transitions into the globe support.

Globe:

- A spherical globe finished in blue-green enamel with gold-toned landmasses. The globe is held aloft by a short gold neck on top of the column.

Top and connections:

- The globe is perched on a small gold cap, integrating with the column to create a continuous vertical axis from base to globe.

Base and plaque:

- The sculpture rests on a black base with a front-facing plaque framed in gold.

Materials and finish:

- The globe features enamel coloring (blue-green with gold continents), while the rest of the trophy is polished gold-toned metal; the base is black.

Style and impression:

- A classic, world-themed award with a strong two-tone aesthetic and a prominent globe as the focal point, suggesting global achievement or international scope.

WOOD & METAL LAUREL STAR

Model
WM 9158

Overall form:

- A trophy mounted on a black base. The gold-toned sculpture rises to a prominent star set within a shield-like frame, with a decorative laurel element accompanying the design.

Laurel motif:

- A gold laurel branch climbs along the left side of the piece, adding an organic, ceremonial touch.

Central column and frame:

- A gold stem supports a shield-shaped frame that encloses a five-point star at its center.

Top ornament:

- The star inside the shield serves as the focal point at the top of the sculpture.

Base and plaque:

- The sculpture sits on a small pedestal atop a black base.

Materials and finish:

- The main sculpture is gold-toned with a glossy finish; the base is black.

Style and impression:

- A ceremonial trophy combining a star-in-shield motif with a laurel accent, presented in a classic black-and-gold palette.

WOOD & METAL LATTICE CROWN

Model
WM 9159

Overall form:

- A tall trophy perched on a black marble base, with a red perforated cone and a sweeping gold lattice that wraps around it. At the top, two gold, blade-like prongs create a crown-like apex.

Central core:

- A red body with numerous small round perforations, giving a studded texture and a sense of depth.

Gold wrap:

- A thick gold ribbon or lattice encircles the cone in a dynamic, ascending spiral, featuring cut-out sections and leaf-like accents where it overlaps.

Top ornament:

- The gold elements converge at the crown, forming a prominent apex that rises above the red body.

Base and plaque:

- The sculpture sits on a small pedestal atop a black marble base.

Materials and finish:

- The gold components appear polished, the red core has a perforated or perforated-like surface, and the base is a dark marble finish.

Style and impression:

- A contemporary, decorative trophy emphasizing a crown motif, ribbon-like dynamics, and a two-tone black-and-gold palette.

WOOD & METAL MONUMENTAL CUP

Model
WM 9165

Overall form:

- A two-piece trophy set on a black base. On the left is a gold trophy cup with two handles, on the right is a tall rectangular plaque framed in black with gold decorative elements.

Cup component:

- A classic gold-toned trophy cup with flared rim and two symmetrical handles, mounted on a dark cylindrical support that rises from the base.

Plaque component:

- A tall, vertical rectangular plaque with a black frame. The interior features gold-toned sections: an upper decorative lattice pattern, a central gold inscription panel, and a lower decorative lattice pattern. There is a logo area at the top of the central panel.

Base:

- A solid black base supporting both the cup and the plaque. In front, a horizontal gold plaque runs along the base's length, intended for inscription.

Materials and finish:

- Predominantly gold-toned metal for the cup and plaque elements, with a black base and frame. The finishes appear polished and glossy.

Style and impression:

- A ceremonial, two-tone black-and-gold trophy with an architectural plaque, combining a traditional cup with a modern geometric plaque design.

- A rectangular front plaque panel set into the base, framed with a gold border; the inscription area is present but the text isn't read here.

Materials and finish:

- The stars and stem are gold-toned metal with a glossy finish; the backdrop and cap are dark, and the base combines light and dark tones.

Style and impression:

- A contemporary prestige trophy emphasizing a star motif with a bold vertical presentation and a clean blue/dark color contrast against the gold accents.

A 10 1/2"
₹ 1345

WOOD & METAL STAR RISE

Model
WM 9177

Overall form:

- A tall trophy with a dark vertical display mounted on a light-colored base, featuring a gold star centerpiece held by a curved gold support.

Top cap:

- A slanted dark cap at the very top with three small stars arranged along its forward edge.

Central display:

- A tall, dark panel forming the main backdrop for the award.

Central sculpture:

- A large polished gold star mounted on a curved gold stem that rises from the base area and curves upward, giving a dynamic, upward-moving motif.

Front plaque area:

- A rectangular plaque area on the front of the base.

Materials and finish:

- The star and stem are glossy gold-toned metal; the backdrop and cap are dark; the base combines light and dark tones with a gold-accent plaque frame.

Style and impression:

- A contemporary prestige trophy emphasizing a bold gold star motif set against a dark backdrop, with a clean, vertical presentation.

A 10 1/2"
₹ 1500

WOOD & METAL STARWARD RISE

Model
WM 9178

Overall form:

- A tall, multi-part trophy with a dark central column, a curved top cap featuring stars, a prominent gold figure in the middle, and a rectangular plaque on the front of a light base.

Top cap:

- A curved, dark (metallic) cap at the very top, adorned with three small silver stars aligned along its leading edge.

Central display:

- A tall, dark panel forming the backdrop for the gold sculpture.

Central sculpture:

- A bright, glossy gold figure with a dynamic pose, resembling a person jumping or reaching upward, mounted on a curved gold stem that rises from the base area and reaches toward the upper portion.

Front plaque area:

- A rectangular plaque mounted on the front of the base.

Materials and finish:

- The gold figure and stem have a polished finish; the backdrop and cap are dark, and the base uses light tones with dark plaque framing.

Style and impression:

- A contemporary prestige trophy emphasizing a rising, aspirational motif with a bold gold figure against a dark backdrop.

₹ 1545

WOOD & METAL ELITE STAR

Model
WM 9179

Overall form:

- A tall, multi-part trophy featuring a dark vertical display mounted on a lighter base, with a prominent gold star centerpiece perched on a curved gold stem.

Top cap:

- A slanted dark cap at the very top, adorned with three small stars arranged along its forward edge.

Central display:

- A tall, dark panel forming the main backdrop for the award.

Central sculpture:

- A large, glossy gold star mounted on a curved gold stem that rises from the base area and reaches toward the upper portion, giving a dynamic, upward motif.

Front plaque area:

- A rectangular plaque mounted on the front of the base.

Materials and finish:

- The gold star and stem are polished; the backdrop and top cap are dark; the base combines dark and light tones with a gold-accent plaque frame.

Style and impression:

- A contemporary prestige trophy highlighting a bold gold star against a dark backdrop, with a clean, vertical presentation.

A 10 1/2"

₹ 1360

WOOD & METAL UNIVERSAL

Model
WM 9180

Overall form:

- A globe trophy perched atop a tall red pedestal, with a small gold neck connecting the globe to the base.

Globe:

- A glossy sphere in blue tones representing oceans, with metallic gold continents giving a world map look.

Neck and cap:

- A short gold stem or neck underneath the globe, transitioning to a small gold collar where the globe sits.

Front plaque area:

- A front-facing plaque on the red pedestal, framed or highlighted by gold, with an inscription.

Base/pedestal:

- A tall, faceted red pedestal that widens slightly at the bottom, giving the piece a sturdy, column-like appearance. The lower portion features a decorative speckled or glittery detail in gold.

Colors and finish:

- The globe is blue and gold (glossy), the pedestal is a glossy red, and the accents (neck, plaque frame) are gold. The overall finish is highly polished.

Style and impression:

- A classic, prestigious globe trophy with a strong vertical emphasis and a bold color contrast between red pedestal and blue-gold globe.

A 13th
₹ 1865

WOOD & METAL OCEANIC

Model
WM 9181

Overall form:

- A tall, slender wooden plaque with a front panel featuring teal resin inlays at the top and bottom, connected by a natural wood surround. The front center contains decorative elements and a formal inscription area, but the actual text isn't read here.

Top section:

- A vertical teal resin block set into the wood, with a curved bottom edge that suggests a wave shape.

Middle section:

- The central wood panel surrounding the resin inlays, creating a framed, vertical display area for text.

Bottom section:

- Another teal resin segment mirroring the top, with a curved edge that complements the wave motif.

Base:

- The plaque sits on a light wood frame as part of a single, solid vertical piece; it's designed to be both a display and a keepsake.

Materials and finish:

- The main body is natural/light wood with a smooth finish; teal resin sections are glossy; gold-toned decorative accents provide contrast.

Style and impression:

- A refined, contemporary plaque with a coastal or wave-inspired motif, combining wood warmth with teal resin and gold accents for a formal award look.

A 9.75"

WOOD & METAL FLORAL FILIGREE

Model
WM 9182

Overall form:

- A circular, medallion-style plaque with a glossy black outer ring, housing a richly ornate central emblem.

Outer frame:

- A thick, black circular disc with a polished finish.

Central emblem:

- A highly elaborate gold filigree surround forming a circular, flower-like rosette.

Innermost disc:

- A bright yellow inner circle set within the gold filigree, featuring a subtle red ring along the inner edge and small blue accents around the perimeter.

Text area:

- A reserved inscription space within the yellow disk.

Finishing details:

- The combination of black, gold, and yellow with touches of red and blue creates a ceremonial, regal appearance.

Style and impression:

- A luxurious, traditional-style award medallion with an emphasis on ornate gold detailing and a strong color contrast.

A 6"X6"
₹ 415

WOOD & METAL CELESTIAL ORB

Model
WM 9183

Overall form:

- A trophy with a dark rectangular base supporting a sculptural centerpiece that combines a golden abstract star motif and a crystal orb.

Top design:

- A tall, intertwining gold star framework that loops and crosses to form a dynamic, multi-point star.

Central element:

- A large, faceted crystal orb resting in a gold cradle near the lower portion of the star framework.

Connections:

- A slim gold stem that visually ties the star sculpture to the orb and the base.

Base and plaque:

- A glossy black pedestal with a front-facing plaque area.

Materials and finish:

- The star structure and cradle are polished gold-toned metal; the orb is clear crystal with facets; the base is black with gold accents.

Style and impression:

- A contemporary trophy with a celestial "star and orb" motif, conveying prestige through contrast between the gold sculpture, the clear crystal orb, and the dark base.

WOOD & METAL APEX STAR

Model
WM 9184

Overall form:

- A tall trophy with a large gold star perched atop a slender black column, mounted on a dark rectangular base with a front inscription plaque.

Top star:

- A three-dimensional, faceted gold star, oriented slightly to the side, giving a dynamic, upward-reaching silhouette.

Connector:

- A gold collar or cap beneath the star, followed by a black, tapered stem that forms the main vertical support.

Accents on the shaft:

- Two gold, ribbed rings around the black column—one near the upper portion and one near the lower portion—adding decorative contrast.

Base and plaque:

- A glossy black pedestal supporting a broader rectangular base; the front features a plaque area.

Materials and finish:

- The star and rings are polished gold-tone metal; the shaft and base are glossy black; gold accents provide a bright contrast against the dark background.

Style and impression:

- A classic, high-contrast prestige trophy with a prominent gold star as the focal point, delivering a ceremonial, celebratory feel.

A 13"
₹ 1850

WOOD & METAL BRIGHT STAR

Model
WM 9185

Overall form:

- A tall trophy with a rectangular, light-colored column, a gold star sculpture mounted on a curved stem, and a decorative base that includes a plaque area.

Top decoration:

- A border or row of small blue, five-pointed stars along the upper edge of the column.

Central sculpture:

- A dynamic gold star arrangement—primarily a large, curved gold arc with multiple smaller stars along its length and a prominent larger star near the top, giving a celestial, ascending feel.

Column:

- A tall, smooth, light-tan or champagne-colored vertical panel that serves as the backdrop for the gold sculpture.

Base and plaque:

- A two-tier base: a smaller gold-toned platform supporting the column, sitting atop a larger, multicolor base that includes a front plaque area.

Materials and finish:

- Polished gold-tone metal for the stars and stem; the column has a glossy light finish; the base combines wood-toned elements with a glossy panel.

Style and impression:

- A contemporary trophy with a prominent star motif and an ascending, celebratory composition, using warm gold tones against a light column and a colorful base.

A 11,75*
₹ 1815

WOOD & METAL CELESTIAL GEM

Model
WM 9186

Overall form:

- A tall, multi-tier trophy with a gold cup mounted on a light column, a faceted gemstone above the cup, and a decorative, two-tone base below.

Top section:

- A beige/light column at the very top with a row of small blue star shapes along the upper edge.

Central sculpture:

- A traditional gold trophy cup positioned on a small platform, just beneath a multi-faceted green gemstone.

Connection:

- A short stem or mounting that links the gemstone to the cup, giving a cohesive vertical composition.

Base and platform:

- The cup sits on a thin wooden platform, which rests on a larger, two-tone base featuring blue and gold panels with an ornate look.

Materials and finish:

- The stars are blue metal, the cup is polished gold-tone metal, the gemstone appears crystal with greenish facets.

Style and impression:

- A ceremonial, celebratory award with a classic star-and-gem motif and a bold color contrast between blue, gold, and beige.

A 11,75^{cm}
₹ 2030

WOOD & METAL POLARIS STAR

Model
WM 9187

Overall form:

- A tall, multi-part trophy with a light-colored column and a prominent gold star mounted on a curved stem atop the column, set on a two-tier base with a front plaque.

Top decoration:

- A row of small blue star shapes along the upper edge of the top section, adding a decorative border.

Central sculpture:

- A large, faceted gold star perched on a curved gold stem, giving a dynamic, upward-reaching silhouette.

Column:

- A tall, rectangular column with a warm, champagne-gold tone and smooth reflective surfaces.

Base and plaque:

- A two-tier base consisting of a smaller upper platform (with a front plaque area) resting on a broader, multi-colored lower base. The plaque area is framed in gold, but the text is not read here.

Materials and finish:

- The star and stem are polished gold-tone metal; the column is a light, metallic Champagne color; the lower base uses a mix of warm tones (wood-like) and gold accents.

Style and impression:

- A celebratory, prestigious award with a classic star motif, combining metallic gold, pale column, and a wooden-toned base for contrast.

A 11,75"

WOOD & METAL MONARCH CREST

Model
WM 9188

Overall form:

- A tall, vertical display plaque in a teal/greenish frame, with a prominent ornate gold crest mounted near the top and a large white inscription plaque attached lower on the front.

Crest at the top:

- A gold heraldic-style emblem featuring a crown perched above a circular central medallion, surrounded by a laurel wreath and a decorative bottom ribbon/band.

Central medallion:

- A gold circular disc with a textured surface.

Laurel and detailing:

- The laurel leaves are detailed and extend outward, forming a balanced, ceremonial frame around the central disc.

Front inscription plaque:

- A white, rounded-corner plaque with a decorative border of green accents; it is mounted onto the teal plaque and covers a sizable portion of the lower front.

Color and finish:

- The frame is a matte teal/green, the crest is bright polished gold, and the lower plaque is white.

Overall impression:

- A formal, prestigious award plaque combining a regal crest with a clean, modern lower inscription plate.

A 10%*

₹ 830

WOOD & METAL PRESTIGE LAUREL

Model
WM 9189

Overall form:

- A tall, vertical award plaque mounted on a flat, rectangular background panel in a muted teal color.

Top emblem:

- A gold laurel wreath encircling a central gold five-point star, occupying the upper-middle portion of the panel.

Placement of emblem:

- The star sits within the wreath, creating a prominent crest-like focal point near the top of the plaque.

Front plaque:

- A white, rounded-corner plaque attached to the lower portion of the teal panel.

Base and mounting:

- The teal panel appears to be a standalone backing plate, giving the entire piece a tall, slender silhouette.

Materials and finish:

- The crest is polished gold-tone metal; the teal backing has a matte finish; the front plaque is a glossy white with colorful graphics.

Style and impression:

- A formal, ceremonial award with a traditional crest motif presented on a modern colored backing.

A 10" x
₹ 995

WOOD & METAL ANGULAR LAUREL

Model
WM 9190

Overall form:

- A tall, two-part award with a textured, dark upper section and a separate, white inscription plaque mounted on a lower portion.

Upper section:

- A vertically oriented block with a highly faceted surface, creating a geometric, diamond-like pattern. In the center, upper area is a circular gold medallion featuring a trophy motif surrounded by laurel accents.

Medallion:

- A polished gold disk with a raised trophy emblem and decorative laurel details, set into the faceted surface.

Lower plaque:

- A white, rounded-corner inscription plaque attached to the lower front.

Base and mounting:

- A dark base supports the upper faceted column and the attached lower plaque, giving the piece a stable, vertical presence.

Materials and finish:

- The upper block appears to be a matte black or very dark material with a complex facet texture; the medallion is gold-tone metal; the lower plaque is white with printed color graphics and a blue logo.

Style and impression:

- A contemporary, corporate-style award with a prominent gold medallion and a bold, faceted frame, combining strong geometric texture with a clean, formal inscription plaque.

A 10"
₹ 1615

WOOD & METAL LUXE GEOMETRIC

Model
WM 9191

Overall form:

- A tall trophy with a dark, faceted panel as the main body. The surface is geometric, with repeating rhombus-like facets giving a prism-like look.

Top emblem:

- A circular gold emblem set into a shallow opening on the faceted panel. The emblem features a five-point star at the center, surrounded by a laurel wreath all in polished gold.

Central element:

- The gold star and laurel are raised within the circular recess, creating a prominent focal point against the dark faceted background.

Panel texture:

- The main body's surface has a dimensional, faceted pattern that catches light from multiple angles, producing a dynamic, modern appearance.

Lower plaque:

- A white rectangular plaque attached to the lower portion of the trophy.

Base and mounting:

- The trophy sits on a dark base that provides stability and supports the upper faceted panel and the attached lower plaque.

Materials and finish:

- The main panel is a dark, resin material with a matte-to-semi-gloss facet texture; the emblem is polished gold-tone metal.

Style and impression:

- A contemporary, premium-looking award with a bold geometric surface and a classic gold crest centerpiece, balancing modern design with traditional laurels.

A 10"
₹ 1675

WOOD & METAL CREST OF THE BLUE

Model
WM 9192

Overall form:

- A tall, freestanding award with a curved, asymmetrical main panel mounted on a solid blue base. The panel looks like a brushed metal or metallic glass framed by a blue outer shape.

Front panel and framing:

- The metallic surface has a rounded, vertical shape with a pronounced curved edge on the left, giving the piece a dynamic, shield-like silhouette. A blue edge or backing wraps around the top and left side.

Top circular emblem:

- A circular medallion near the upper-right portion of the panel, set in a silver ring.

Central area:

- A white inscription area toward the middle-right of the panel where graphics and text appear.

Base and mounting:

- The panel sits atop a solid, dark blue base that provides stability and a strong color contrast with the metal panel.

Materials and finish:

- The main panel appears to be a brushed metal; the blue areas are colored coated metal; the base is a solid blue material, painted wood.

Style and impression:

- A contemporary, corporate-style award with a crisp combination of silver/metallic and blue tones, featuring a prominent circular emblem for visual emphasis.

A 8.73"
₹ 500

WOOD & METAL PRISM MOSAIC

Model
WM 9193

Overall form:

- A freestanding award with a vertical, teal frame that stands on a solid teal base. A white certificate-like panel is mounted inside the frame at a pronounced tilt, creating a dynamic, angled presentation.

Frame design:

- The teal frame features a pattern of tall, narrow, irregular vertical slits or cutouts along its surface, giving a light, architectural look. The frame surrounds the panel on multiple sides, leaving the panel prominently displayed.

Mounted panel:

- The white panel is geometric and slightly trapezoidal, tilted forward within the frame.

Central area:

- The panel includes a central area likely intended for text, though the exact wording is not to be read here. The decorative color blocks frame the upper and lower portions of the panel.

Materials and finish:

- The frame and base appear to be coated metal or sturdy plastic with a matte to satin teal finish. The panel is a white, paper-like insert with printed color shapes.

Style and impression:

- A modern, corporate-leaning award with a bold teal color, a lattice-frame motif, and a vibrant, geometric-accent panel that adds visual energy.

A 8.73"
₹ 590

WOOD & METAL PRISM MOSAIC

Model
WM 9194

Overall form:

- A tall, multi-panel award with a dark left/upper section and a warm-toned right panel, connected by a diagonal seam that creates a dynamic, angular composition. It sits on a light-colored pedestal base.

Right panel:

- A vertical, bronze/gold-toned surface forming the main right side. It has clean edges and a slightly contoured shape that adds depth.

Central emblem:

- A prominent hexagonal inset mounted toward the upper-middle of the right panel.

Hex geometry:

- The hex inset rises from the right panel with a stepped, multi-layered surround, giving a three-dimensional, architectural look.

Left detail: The left portion of the award features a white panel.

Front plaque area:

- A white, angled plaque at the lower left area holds text and graphics.

Base and mounting:

- A light beige pedestal base provides stability and a neutral counterpoint to the two-tone upper structure.

Materials and finish:

- The dark left section appears to be a matte or satin-finish material; the right bronze/gold panel has a metallic finish; the hex inset uses layered whites and metallic trims; the base is a smooth, solid beige material.

A 8.75"
₹ 500

WOOD & METAL DYNAMIC CREST

Model
WM 9195

Overall form:

- A tall, two-part award mounted on a rectangular wooden base. The right side is a tall white panel with curved edges, while the left side is a dark, textured block. The two portions come together with a diagonal seam, giving an asymmetric, dynamic silhouette.

Left panel:

- A dark, almost black block with a pronounced faceted surface that creates a geometric, jewel-like texture.

Right panel:

- A tall white central panel with smooth, curved edges.

Base and mounting:

- A light-colored wooden base supports the two-part structure, anchoring it visually and physically.

Small trophy element:

- A gold-toned trophy figure sits on the left side of the base, providing a tactile focal point at ground level.

Materials and finish:

- The left panel appears to be a matte dark material with a geometric texture; the right panel is a glossy white with printed color accents; the red areas are bold color additions; the base is natural wood; the small

trophy is gold-toned metal.

- Style and impression: A contemporary, corporate-leaning award that blends a faceted dark element with a bright, curved white panel to convey both solidity and motion.

A 10"
₹ 1405

WOOD & METAL ARC EXCELLENCE

Model
WM 9196

Overall form:

- A tall, two-part award mounted on a rectangular wooden base. A central white plaque with curved colored accents is flanked by darker elements on the left and a dark edge/frame on the right. A gold-toned figurine holding a star sits on the base to the left of the plaque.

Left element:

- A textured, dark panel that forms a curved backdrop behind the central plaque, adding depth and contrast.

Right edge:

- A dark vertical edge or frame that defines the outer boundary of the plaque.

Base and mounting:

- A light wooden base supports the assembly, providing stability and a warm contrast to the dark and white elements.

Trophy figure:

- A small, gold-toned statuette of a person holding a star, mounted on the base to the left of the plaque.

Materials and finish:

- The left backdrop is textured dark material; the central plaque is smooth white with printed color graphics.

Style and impression:

- A contemporary, corporate-leaning award with a striking contrast between dark backdrop, bright white plaque, and vivid color accents, plus a classic gold-star figure.

A 10"

WOOD & METAL CRESCCENT ARC

Model
WM 9197

Overall form:

- A tall, asymmetric trophy with a curved white central plaque set against a multicolored backdrop and mounted on a light-colored pedestal. A gold-toned trim defines the outer edge, giving the piece a refined architectural silhouette.

Central plaque:

- A curved, vertically oriented white panel with rounded edges.

Lower/left element:

- A wooden panel on the left side of the trophy provides contrast and contains a gold-toned star mounted toward the lower portion.

Base and mounting:

- A solid, light beige pedestal supports the entire assembly, giving it stability.

Materials and finish:

- The main curved panel appears to be a printed or laminated white surface with a glossy finish; the backdrop uses colored elements (green/blue) with a metallic gold trim; the star is a polished gold-tone metal; the base is a matte beige material.

Style and impression:

- A contemporary, corporate-style award with a bold color scheme, curved geometry, and a star accent, combining clean white space with vibrant graphics.

A 115⁺

WOOD & METAL REGAL ARC

Model
WM 9198

Overall form:

- A tall, curved trophy/plaque with a slender, shield-like profile mounted on a light-colored pedestal.

Outer frame:

- A gold-toned, curved edge that follows the contour of the main panel, giving the piece a regal, architectural silhouette.

Base component:

- A wooden section at the midpoint below the central panel, hosting a gold-toned crown embellishment.

Crown element:

- A decorative gold crown mounted on the wooden portion near the bottom, adding a regal focal point.

Base pedestal:

- A solid, light beige pedestal/root base that supports the entire piece.

Materials and finish:

- The curved frame and crown appear to be gold-toned metal; the central panel is a glossy white surface with printed blue graphics; the wooden section has a natural finish; the base is a smooth beige material.

Style and impression:

- A contemporary, ceremonial award with a strong royal motif (crown) and blue accent graphics, combining metallic and wood elements for a premium look.

₹ 1000

WOOD & METAL OAK FRAME

Model
WM 9201

Overall form:

- A tall, framed recognition plaque mounted in a wooden frame with a recessed inner display. The piece presents as a vertical award inside a rectangular wooden surround.

Frame and enclosure:

- The outer frame is a warm wood tone with a simple, squared edge. Inside, a dark vertical panel provides contrast and depth.

Central panel:

- A white, vertically oriented plaque insert sits within the dark inner area. The black inner area features a series of vertical ridges along the left side.

Decorative element:

- A gold-toned star-shaped trophy is mounted at the lower left area within the display, serving as a prominent, tactile accent.

Base and mounting:

- The whole display sits within the wooden frame, with the inner certificate resting on a dark backing and the star anchored toward the front-left for visual balance.

Materials and finish:

- The frame appears to be natural wood; the inner panel is a dark, likely plastic or composite material with a matte/satin finish; the certificate is white with a subtle geometric background; the star is polished gold-toned metal.

Style and impression:

- A classic, formal award presentation with a modern twist—contrasting light and dark tones, plus a metallic star accent for emphasis.

A 10"
₹ 1325

WOOD & METAL STARBOUND FRAME

Model
WM 9202

Overall form:

- A portrait-style display housed in a rectangular wooden frame with a warm brown finish. The piece presents as a two-part composition inside the frame.

Left interior:

- A vertical, black ribbed panel that forms a dark backdrop on the left side of the interior.

Right interior:

- A tall white certificate panel with curved edges, mounted upright within the frame beside the black backdrop.

Trophy element:

- A gold-toned figurine of a person with arms raised, holding a star above the head, attached along the left side of the interior near the lower portion.

Base and mounting:

- The entire assembly is enclosed by the wooden frame.

Materials and finish:

- The outer frame is wood; the interior left panel is a dark, textured material; the certificate panel is white and glossy; the trophy is metallic gold-tone.

Style and impression:

- A formal, award-style display with a prominent star motif, combining a classic wooden framing with a contemporary certificate panel and a decorative gold trophy element.

₹ 1245

WOOD & METAL CELEBRATION FRAME

Model
WM 9203

Overall form:

- A wooden display case with a recessed inner cavity holding a vertical certificate panel and a decorative trophy mounted to the left side inside the frame.

Outer frame:

- A rectangular wooden frame with a medium brown finish, simple mitered corners, and a shallow depth.

Inner background:

- A black interior wall with vertical ribbing - on the left side, providing texture and contrast.

Trophy element:

- A gold-toned sculptural trophy with stars, positioned toward the lower-left inside the frame, leaning slightly toward the certificate.

Base/mounting:

- The entire assembly is contained within the wooden frame; there is no separate pedestal visible outside the frame.

Materials and finish:

- The frame and inner mounting are wood; the certificate panel is glossy white with printed color graphics; the trophy is polished gold-tone metal.

Style and impression:

- A contemporary, formal award presentation combining a classic wooden frame with a vibrant, curved graphic certificate and an eye-catching gold star trophy.

A 10"
₹ 1480

WOOD & METAL VERTEX STAR

Model
WM 9204

Overall form:

- A tall, sculptural trophy with a curved black outer shell that tapers slightly, giving a sleek, modern silhouette.

Top element:

- A gold-toned five-point star set inside a gold laurel wreath mounted on the upper-front face of the black panel.

Middle feature:

- A textured, faceted silver/gray panel that runs diagonally across the midsection, adding a geometric contrast to the smooth black surface.

Base and mounting:

- The trophy appears to be a single piece mounted on a base (not fully visible in the image), with the base color and material not clearly shown.

Materials and finish:

- The outer shell is a high-gloss black material (likely resin or metal), the mid panel is a metallic silver with a faceted texture, and the top/bottom accents are polished gold-tone metal.

Style and impression:

- A contemporary, award-style piece with bold contrasts — black curved shell, shimmering silver facets, and bright gold accents, centered around a star-and-laurel motif.

Overall form:

- A tall, freestanding trophy with a sculpted, carved black outer surface. The piece has a three-zone composition and stands more like a slender pillar than a traditional plaque.

Upper element:

- A gold-toned shield badge affixed to the front of the black curved panel near the top, acting as a prominent decorative emblem.

Middle element:

- A textured, faceted panel in a metallic gray tone runs diagonally across the midsection, adding a crystalline, geometric contrast to the smooth black shell.

Base and mounting:

- The sculpture tapers toward the bottom and appears to be mounted on a base that is partially visible, giving it stability while maintaining a sleek profile.

Materials and finish:

- The outer shell is a high-gloss black material; the mid-panel is a faceted metallic texture.

Style and impression:

- A contemporary, corporate-style award with bold contrast and a focal shield emblem, combining a glossy black form, a geometric mid-section, and a color-rich nameplate.

WOOD & METAL ARCHLIGHT

Model
WM 9207

Overall form:

- A tall, curved, arch-shaped award display mounted on a rounded, light-colored base. A separate smaller trophy sits to the left, attached or placed on the same base/area.

Main panel:

- A tall, white central panel with a pronounced curved outer edge forming a semi-arch shape. The panel is framed by a thin edge, giving a beveled look.

Lower/support elements:

- A dark, ribbed base element runs along the bottom front of the arch, adding contrast and visual weight.

Base and mounting:

- The whole assembly sits on a rounded beige platform base, providing stability.

Secondary trophy:

- A gold-toned statuette on the left side, featuring a tall, slender stem and a star-motif at the top, mounted on its own small base.

Materials and finish:

- The main arch and panel appear to be metal or composite with a glossy finish; the gradient accents are printed or painted; the ribbed bottom is dark, likely plastic or metal; the left trophy is polished gold-tone metal.

Style and impression:

- A modern, corporate award with a strong color-forward design, combining an arch-shaped display with a decorative star-trophy element for emphasis.

WOOD & METAL ARCHLIGHT

Model
WM 9208

Overall form:

- A tall, curved trophy with a white central panel framed by a sweeping, arch-like silhouette. It stands on a rounded base and is accompanied by a separate gold star sculpture on the left.

Central panel:

- A glossy white vertical panel with rounded edges, set within a curved outer shape that hints at a dynamic, architectural profile.

Outer silhouette:

- A bold, curved enclosure around the white panel, with contrasting color accents giving a sense of motion and depth.

Left-side sculpture:

- A separate gold-toned star-themed piece, composed of multiple star elements arranged in a decorative stack or cluster, mounted on its own small base.

Base and mounting:

- The main trophy sits on a rounded beige platform; the star sculpture rests on its own small pedestal adjacent to the base.

Materials and finish:

- The white central panel is glossy; the red/gray curves appear as printed or painted graphics; the curved outer shell is likely a metallic or resin material with a dark finish; the star sculpture is polished gold-tone metal.

Style and impression:

- A contemporary, prestige trophy combining a dramatic arch design with a radiant gold star motif, presenting a modern corporate awards aesthetic.

WOOD & METAL VERTEX STAR

Model
WM 9209

Overall form:

- A two-piece award display featuring a gold-toned trophy on the left and a tall rectangular plaque on the right, both mounted on a common base or stand.

Left trophy:

- A slender, gold-toned sculpture with a stylized stem that rises and splits into curved elements culminating in a star at the top. The base is a dark, geometric, faceted pedestal that provides a bold contrast to the shiny metal.

Color and pattern:

- The left trophy is metallic gold, the pedestal is dark with angular facets. The right panel combines a triangular mosaic motif (at the top and bottom) with a light geometric center.

Materials and finish:

- The trophy is polished gold-tone metal, the pedestal is a dark, faceted material.

Style and impression:

- A contemporary, corporate-style display that pairs a radiant star motif with bold geometric graphics for a dynamic, prize-like presentation.

WOOD & METAL AURORA STAR

Model
WM 9210

Overall arrangement:

- A two-piece award presentation with a gold trophy on the left and a tall rectangular plaque on the right, mounted together on a common base or display stand.

Left trophy:

- A slim, gold-toned sculpture with a curved stem that splits into two upward-reaching elements, each ending in a star. The trophy sits atop a dark, faceted pedestal that provides a bold contrast.

Color and pattern:

- The left piece is shiny gold; the pedestal is a dark, faceted surface; the right panel combines a geometric background with a multi-tone color accent around the edges and a bright logo at the top.

Materials and finish:

- The trophy is polished metal (gold-toned); the pedestal appears to be a textured dark material.

Style and impression:

- A contemporary, corporate-style awards display that mixes a radiant star motif with bold geometric graphics for a prize-oriented presentation.

WOOD & METAL STAR LEADERSHIP

Model
WM 9212

Overall arrangement:

- A two-part award display mounted on a vertical frame. The top portion is a framed plaque or certificate, and the bottom portion holds a separate gold-toned star trophy set into a dark, textured base.

Bottom trophy:

- A gold-toned star on a slender stem, mounted within a rounded inset in a dark, faceted base. The star sits prominently and appears to be the main decorative element of this portion.

Base and mounting:

- The two parts share a common vertical alignment, giving the appearance of a single, tall award unit with a separate trophy embedded in the lower section.

Materials and finish:

- The frame appears to be wood or wood-like material; the top plaque is a glossy printed panel; the trophy is polished gold-tone metal; the bottom base is a dark, textured material with a faceted surface.

Style and impression:

- A contemporary, corporate award with a clean two-part design: a stylized certificate area above and a gold star trophy below, combining formal presentation with a bold star motif.

WOOD & METAL UNITY

Model
WM 9213

Overall form:

- A vertical, two-part award mounted on a teal-colored backing. A gold-tone handshake sculpture sits near the top, with a white certificate-style panel mounted below it.

Handshake element:

- A polished gold-tone sculpture of two hands clasped in a handshake, mounted flush to the teal backing.

Color and pattern:

- Teal backing provides a solid, contemporary background; the handshake is bright gold, the certificate panel is white with blue graphic accents.

Materials and finish:

- The handshake appears to be metal with a high-polish gold finish; the backing looks like painted wood or resin; the certificate panel is a printed/covered plaque with a glossy surface.

Base and mounting:

- The entire assembly is a single upright unit, suggesting it mounts on a base or pedestal integrated into the lower portion of the structure.

Style and impression:

- A modern, corporate award design that highlights a symbolic handshake above a formal certificate, combining metal shine with a clean, graphic certificate layout.

WOOD & METAL STELLAR LEADERSHIP

Model
WM 9220

Overall form:

- A freestanding trophy displayed in a tall, dark blue acrylic case with an open front, mounted on a light wood base. The unit is vertical and portrait-oriented.

Statue element:

- A gold-tone figure with arms raised, holding a star at the top. The figure stands on a small white pedestal inside the case.

Case interior:

- The interior backdrop appears dark (black/very dark) to highlight the gold statue. The white pedestal provides a contrasting platform for the figure.

Front plaque:

- A gold-colored plaque is affixed to the lower front of the display case, featuring a multicolor logo and a space for text.

Colors and finish:

- The frame is a glossy dark blue; the statue is polished gold; the pedestal is white; the base is light wood; the logo is multicolored.

Materials and texture:

- Frame likely plastic or lacquered metal; statue and plaque are metal with enamel or printed color details; base is wood.

Mounting and orientation:

- A single vertical unit designed to sit on a base, suitable for tabletop display or pedestal placement.

Style and impression:

- Modern, celebratory, with a strong emphasis on achievement and aspiration through the raised-star motif.

WOOD & METAL VERTEX STAR

Model
WM 9221

Overall form:

- A tall, vertical trophy on a square pedestal. The upper portion is a sculpted gold-toned trophy figure with the prominent star at the top, mounted on a decorative column that widens toward the base.

Top element:

- A five-pointed star sits at the apex, crafted in brushed gold with chip-faceted faces to catch light.

Central column:

- A sculpted column that features alternating rounded and angular contours, with a curved, tapering form. The column has decorative bands and a subtle, embossed look that suggests movement and elegance.

Neck details:

- A wider collar area beneath the star includes laurel-like motifs, adding a classical touch to the design.

Base and pedestal:

- A sturdy, dark square pedestal supports the trophy. The base has a stepped, ribbed edge near the top, giving a solid foundation and a ceremonial feel.

Colors and finish:

- The trophy is mainly gold-toned metal with a brushed finish; the pedestal is dark, the nameplate is gold/silver/copper-toned with a dark inscription.

Materials and texture:

- Metal components for the trophy, a wooden or composite pedestal with a glossy or matte finish, and a metal brass plate for the inscription.

Style and impression:

- A classic yet bold commemorative award with a ceremonial star motif and an ornate column, conveying prestige and achievement.

Overall form:

- A freestanding trophy with a large gold/silver/copper star on top, mounted on a black, glossy pedestal.

Top element:

- A prominent, five-pointed gold/silver/copper star, slightly angled, with a crisp, shiny finish.

Support column:

- The star is attached to a short gold/silver/copper collar that sits on the top of the pedestal, giving the star some height.

Pedestal:

- A tall, black, glossy base with clean geometric lines. The top surface appears flat to support the star assembly.

Front plaque:

- A rectangular plaque mounted on the front face of the pedestal.

Base details:

- The pedestal sits on a broader black base, giving the award a solid, substantial presence.

Materials and finish:

- Polished gold/silver/copper-tone metal for the star and stem, a high-gloss black pedestal likely made of resin or metal with a lacquer finish.

Style and impression:

- Classic, ceremonial, with a bold, celebratory star motif signaling achievement and recognition.

Decorative Elements:

- Gold-colored stars are attached to the maroon surface, on the upper left or right corner of the plaque.

Variations:

- One large star. (A)
- Two stars (one large, one small). (B)
- Three stars (one large, two small), arranged in an ascending line. (C)

Overall Aesthetic:

- The design is contemporary and eye-catching, combining traditional trophy elements with a more stylized and polished look.
- The gold, red, and yellow color combination creates a vibrant, celebratory tone, perfect for awards related to performance or excellence.

WOOD & METAL STAR OF SERVICE

Model
WM 9737

Overall form:

- A traditional tabletop trophy with a square pedestal base supporting a central pillar and a decorative column that rises to hold a star motif.

Base:

- A dark, glossy wooden square base with beveled edges. The base has a metallic plate on one side displaying inscription.

Column and cap:

- Above the base, there is a metallic, polished collar (silver tone) that sits atop a maroon or burgundy pedestal. A curved gold-toned stem arches from the collar and culminates in a star on top.

Star element:

- A five-pointed star at the crown of the curved stem, finished in a shiny gold tone.

Materials:

- Appears to be a combination of polished wood (base), metal (plate, collar, stem, and star), and a lacquered finish on the pedestal.

A 0.73"
₹ 855

WOOD & METAL EXCELLENCE AWARD

Model
WM 9743

Overall form:

- A multi-part trophy with a tall, vertical silhouette culminating in a star at the top.

Base:

- A dark, perhaps black or very dark, platform on which the trophy rests.

Lower pedestal:

- A light-colored rectangular plaque panel mounted on a rectangular column.

Primary column:

- A cylindrical column with a glossy finish, likely maroon or dark brown, separated from the base by a gold-toned collar.

Uppersupport:

- A gold-toned stem or structure rising from the upper collar, forming a curved, slender support.

Star element:

- A large, gold-toned star at the top, with one arm curving upward and a dynamic, elongated shape.

Materials and finish:

- A combination of dark wood or dark marble-like material for the pedestal, gold-toned metal accents, and a light-colored inscription plaque. The overall look is ceremonial and polished.

A 10" x 10"
₹ 1350

WOOD & METAL ELEGANT (EVERLASTING)

Model
WM 9762

Overall form:

- A trophy with a tall, elegant column rising from a wide, square-ish base, topped by a clear crystal or glass handshake figure.

Base:

- A dark, glossy wooden pedestal with a broad, flat bottom and beveled edges; the base has a rich, cherry-like finish.

Column:

- A slender, hourglass-shaped central column in a deep burgundy wood tone, flaring slightly toward both ends; a gold-toned collar sits at the top where the column meets the head.

Top element:

- A translucent or crystal handshake sculpture mounted atop a gold-tone ring, giving a distinguished, ceremonial appearance.

Finishes:

- The trophy combines dark wood tones with gold metal accents and a crystal-clear top piece, creating contrast between materials.

Materials:

- Wood (base and column), metal (gold-tone rings and accents), and clear crystal for the handshake figure.

Aff
₹ 2090

WOOD & METAL ELEGANT (WELL DONE)

Model
WM 9764

Overall form:

- A trophy with a tall, elegant, wooden column atop a multi-faceted base, crowned by a clear glass or crystal hand giving a thumbs-up gesture.

Base:

- A dark, polished wooden square base with beveled edges and a slightly rounded bottom edge, giving a sturdy foundation.

Column:

- A slender, hourglass-shaped wooden column in a rich reddish-brown wood finish. It widens toward the top and narrows toward the middle, with smooth contours.

Finishes:

- The wood has a glossy lacquer, accented by gold-tone rings at the top of the column and around the base of the hand, adding contrast.

Top element:

- A transparent hand sculpture (likely crystal) forming a thumbs-up, mounted on a gold-tone disk that sits atop the column.

Assembly:

- The hand sits on a small pedestal ring, which is affixed to the top of the column, completing the trophy.

Materials:

- Wood (base and column), crystal for the hand, and metal (gold-tone rings and accents).

₹ 2030

WOOD & METAL AMPLE (DIAMOND)

Model
WM 9765

Overall form:

- A traditional trophy with a tall vertical column, a spherical crystal ornament on top, and a multi-faceted square base.

Base:

- A dark, matte, polygonal pedestal (double-layered appearance) that provides a wide, sturdy foundation and tapers slightly upward.

Column:

- A tall, tapered column with a rich dark red finish (wood-like appearance) and subtle faceting to give angular planes.

Mounting hardware:

- A thin gold ring sits at the top of the column, serving as a collar between the column and the crystal topper.

Top element:

- A large, clear, faceted crystal sphere topper, cut with multiple facets to reflect light, giving a jewel-like gleam.

Materials and finishes:

- Combines dark red/brown wooden-looking column with gold-tone accents and a black base, and a clear crystal topper to create a premium look.

WOOD & METAL AMPLE (GLOBE)

Model
WM 9766

Overall form:

- A traditional trophy with a tall, faceted column supporting a globe atop, mounted on a multi-tiered base.

Base:

- A solid black pyramid-like square base providing a stable foundation.

Lower pedestal:

- A burgundy or dark red, angular hexagonal column that tapers slightly, giving a tall, elegant profile. The column has subtle faceting to catch light.

Collar:

- A gold-toned ring at the top of the column, serving as a decorative transition to the globe.

Top element:

- A translucent or crystal globe featuring a light map-like pattern, mounted on a gold-toned cap.

Materials and finishes

- Column: Dark red/brown wood-like finish with metallic gold accents.
- Globe: Clear or frosted crystal globe with etched map details.
- Base: Black, matte, solid platform for contrast and stability.
- Accents: Gold-tone rings and caps to highlight transitions.

WOOD & METAL CROWN ACHIEVEMENT

Model
WM 9827

Overall form:

- A tall trophy featuring a golden figure raising a large geometric cup-like shape above its head, mounted on a cylindrical wooden base with a plaque.

Figure:

- A stylized, full-length golden statue of a person with both arms raised overhead, supporting a large, inverted pyramid/diamond-shaped cup.

Cup/top element:

- A gold, faceted, angular cup that resembles a diamond or pyramid with a hollow interior; the figure's hands grip its sides as if lifting it.

Base:

- A dark wood or wood-like pedestal with a flat, circular top and a broad, rounded cylindrical body. The base supports the statue securely.

Materials and finishes:

- Predominantly gold-toned metal for the statue and cup, a dark wood base, and a metallic plaque. The finish is polished and reflective, giving a ceremonial appearance.

Aff

WOOD & METAL DISTINGUISH

Model
WM 9840

Overall form:

- A tall, elegant trophy with a black marble-like base, a gold and black slender column, and a prominent decorative cup and globe at the top.

Base:

- A square, dark pedestal with a gold-accented plaque on the front.

Column and midsection:

- A tapered, sculpted column that blends black and gold-tone surfaces. The central shaft appears black with gold-toned vertical elements flaring outward, giving a dynamic, ribbon-like silhouette.

Top ornament:

- A clear, faceted crystal or glass globe mounted atop a gold cradle or support. Behind and around the globe, gold-toned curved elements rise, adding height and a sense of motion.

Materials and finishes:

- Gold-tone metal accents (ribbon elements and fittings), a dark black column section, a clear crystal globe, and a polished black base with a decorative gold plaque.

WOOD & METAL INSPIRATIONAL

Model
WM 9854

Overall form:

- A tall, shield-shaped trophy with a curved top, mounted on a two-part base.

Shield body:

- A bright gold central panel bordered by red edges and decorative side rails. The central panel tapers to a point at the bottom, giving an elongated shield silhouette.

Border details:

- Red outer border with gold trim and side vertical columns of stars. The stars are arranged in rows along the red borders.

Top emblem:

- A small multi-colored triangle logo near the top center of the shield.

Base:

- A two-part base consisting of a glossy black pedestal.

Materials and finishes:

- The shield panel appears to be metallic or plastic with a glossy finish; red and gold colors give a ceremonial, celebratory look; the base is black with a metallic gold accent and plaque.

WOOD & METAL DISTINGUISH

Overall form:

- A tall, gold-colored statuette trophy standing on a dark base with a gold plaque on the front.

Figure:

- A stylized, full-body human figure in a classical pose, standing upright with arms crossed or hands clasped at the waistline. The figure is smooth and shiny with a polished metallic finish.

Head and features:

- Distinct head with simple facial features, proportionate to the body; overall, the head is cube-like in styling but clearly human.

Base:

- A cylindrical, dark reddish-brown base (wood-like material) supporting the statue. The base has a flat circular top where the statue rests.

Plaque:

- A gold-colored metal plaque mounted on the front of the base. The plaque is oriented vertically.

Materials and finishes:

- Predominantly gold-toned metallic figure with a polished finish; dark wooden or wood-like base; gold plaque with black etched text. The overall look is ceremonial and prestigious.

WOOD & METAL EXCELLENCE CIRCLE

Model
WM 9862

Overall shape:

- A circular (round) gold-toned plaque or mirror mounted on a dark base, with a small decorative star at the bottom of the circular face.

Circular face:

- A smooth, reflective gold surface framed by a dark, slightly beveled ring. The surface is plain and unadorned in this image.

Star and pedestal:

- A small, five-pointed gold star sits at the bottom edge of the circular face, resting on a thin gold plate anchored to a dark, glossy pedestal. The star appears to be decorative, pointing upward.

Base:

- A bulky, rectangular dark pedestal with a glossy finish, providing stability and contrast to the shiny gold components.

Finishes:

- The gold field and star have a polished, metallic look; the frame around the circular face and the base are dark, glossy plastics or metals.

WOOD & METAL LEADER OF THE YEAR

Model
WM 9871

Overall form:

- A tall, black pedestal with a curved top, supporting a gold statuette of an Oscar-like figure. The setup resembles an award trophy with a display panel above the figure.

Upper display:

- A semicircular arch on the back panel, featuring two rows of small gold stars arranged in a grid (three rows visible: top row of six stars, middle row of five, bottom row of four; all star shapes are gold on a dark background).

Central figure:

- A polished gold humanoid statuette (resembling an Oscar) standing upright on a round pedestal base. The figure holds a large star in front of its chest with both hands, presenting a formal, ceremonial pose.

Base:

- A multi-tiered black pedestal; a broader lower tier supports a narrower upper section where the statuette stands, giving a sturdy, elegant look.

Color and finishes:

- Predominantly glossy black for the pedestal and display panel; bright gold for the statuette and stars, with a high-shine metallic finish.

B 12"
₹ 1860

WOOD & METAL EXECUTIVE EXCELLENCE

Model
WM 9872

Overall shape:

- A tall, ornate trophy with a rounded, shield-like central plaque mounted on a dark stepped base.

Top embellishment:

- A large, multi-faceted gem or crystal perched atop the trophy, displaying a spectrum of colors (rainbow reflections).

Central plaque:

- A gold-toned, curved shield panel.

Base:

- A glossy, dark pedestal with stacked layers, providing a sturdy foundation and a ceremonial appearance.

Finishes:

- The central plaque has a shiny, reflective gold surface with red and black details; the top gem is multi-colored and prism-like; the base is dark and polished.

B 7.55
₹ 995

WOOD & METAL EXECUTIVE EXCELLENCE

Model
WM 9875

Overall form:

- A tall, sculptural trophy with a dark, curved back support that arches upward, framing a circular gold centerpiece mounted on a black pedestal.

Central element:

- A round wooden polished surface.

Back support:

- A large, asymmetrical, dark blue-black curved element that sweeps behind the central disc, giving the trophy a dynamic, lifting appearance.

Base:

- A two-part base consisting of a glossy black rectangular platform with a gold-colored nameplate area, resting on a wider, lighter-colored plinth. A slim gold accent sits atop the base between the pedestal and the disc.

Finishes and colors:

- The centerpiece is bright gold; the back support is deep dark blue-black; the base combines black with a gold plate for engraving or branding.

WOOD & METAL EXECUTIVE SHIELD

Model
WM 9877

Overall form:

- A trophy with a tall, shield-like central face mounted on a dark, rectangular base. The shield has a convex, curved contour at the top and tapers slightly toward the bottom, giving a smooth, upright silhouette.

Central plaque area:

- A large, smooth, gold-toned surface set within a dark frame. The gold panel is blank.

Frame and edges:

- The shield edge is bordered by a dark, slightly textured trim that follows the shield's curved outline, enhancing contrast against the gold center.

Base:

- A chunky, rectangular pedestal with a slightly rounded top edge, finished in a dark color to match the frame around the shield.

Finishes:

- High-contrast combination of polished gold for the central plate and matte/dark finish for the surrounding frame and base.

WOOD & METAL ELEVATION AWARD

Model
WM 9878

Overall form:

- A ceremonial trophy with a shield-shaped central plaque mounted on a dark base.

Central plaque:

- A smooth, gold-tooled shield insert with a slight convex curvature, framed by a dark, textured border that follows the shield outline.

Frame and edges:

- The border around the gold shield is a thick, dark material, giving a bold contrast to the bright gold center.

Base:

- A solid, rectangular pedestal in a dark color with a slight bevel on the top, providing a stable foundation for the plaque.

Finishes:

- The gold panel has a polished, reflective surface; the surrounding frame and base have a matte/dull finish, typical of plastic or coated metal.

₹ 425

WOOD & METAL NEXUS MERIT

Model
WM 9883

Overall form:

- A stylized trophy sculpture featuring a curved, half-oval gold plate mounted on a black base. The composition includes three abstract human-like figures standing in a row along the top edge.

Central plate:

- A smooth, reflective gold surface with a curved top edge, forming a shallow, semicircular face.

Figures:

- Silhouette-style figures in a gold tone, each with a circular head and a simplified body shape. They are arranged along the top of the curved plate, leaning slightly forward as if marching or in motion.

Base:

- A solid, glossy black pedestal with a multi-tiered design, providing stability and contrast to the gold plate.

Finish and materials:

- Predominantly gold-tone metal for the plate and figures, with a high-gloss black base. The edges and internal mounting appear dark, creating a strong two-tone contrast.

A 7.5"
₹ 1095

WOOD & METAL PINNACLE FRAME

Model
WM 9887 AL

Overall form:

- A trophy with a vertical rectangular black frame housing a gold-toned sculpture and a gold plaque at the bottom.

Sculpture:

- A stylized gold figure consisting of a large star at the top, a curved trailing crescent shape, and a smaller star near the lower left of the curve. The elements create a dynamic, upward-sweeping motif.

Frame and border:

- A glossy black outer frame. The inner border around the sculpture is a metallic silver tone, forming a double-layered framed look.

Plaque:

- A gold-toned rectangular plaque near the bottom of the display with rounded corners.

Materials and finish:

- The trophy uses metal (gold-tone) for the sculpture and plaque, with a high-gloss black frame and a clear protective front. The plaque has a brushed or polished finish with black text.

Color palette:

- Gold sculpture and plaque, black frame, and silver inner border.

A 10 1/2"

₹ 1905

WOOD & METAL CORPORATE STAR

Model
WM 9889

Overall form:

- A tall, rectangular plaque with a dark frame and a clear central display area.

Top feature:

- A gold-toned star sculpture mounted in the upper portion of the inner display. The star is five-pointed and appears to be attached to a curved, flowing stem or ribbon-like element that winds downward.

Base of sculpture:

- The stem/ribbon culminates in a small, rounded base that supports the star.

Central display:

- The star and stem are set against a light background within a recessed window of the frame, creating a floating appearance.

Plaque area:

- A gold-colored metal plate is mounted on the lower portion of the frame.

Materials and finish:

- The frame appears to be a dark wood or wood-like material with a glossy finish; the inner display surface is light or metallic, and the star/symbol is gold-tone metal with a polished finish.

Style and impression:

- Ceremonial and corporate, combining a symbolic star with a ribbon motif to convey achievement and recognition.

A 10 1/2"

₹ 2215

WOOD & METAL ELEVATED STARS

Model
WM 9910

Overall form:

- A freestanding trophy consisting of two gold/silver/copper stars arranged in a staggered vertical stack, mounted on a dark pedestal.

Star elements:

- Two identical five-pointed stars in polished gold/silver/copper-tone metal. The upper star sits slightly offset behind the lower star, creating depth and a sense of ascent.

Mounting:

- The stars are connected by a short, curved stem or support that visually links them, giving the impression that one star rises above the other.

Central support and base:

- The star assembly sits atop a rectangular, dark pedestal with clean lines.

Plaque:

- A gold/silver/copper-colored metal plaque is mounted on the front face of the pedestal, with text. The plaque is framed by the dark surface of the pedestal, providing contrast.

Finish and materials:

- Polished gold/silver/copper-tone metal for the stars and plaque; a matte or glossy dark base, likely resin or metal, with a weighty, trophy-like presence.

Style and impression:

- Contemporary ceremonial with a celebratory two-star motif signaling milestone achievement and recognition.

WOOD & METAL INNOVATION EXHIBIT

Model
WM 9919

Overall form:

- A tall, freestanding vertical banner or exhibition placard mounted on a rectangular pedestal.

Shape and orientation:

- The main banner is tall and narrow, attached to the white marble-textured surface of the pedestal. The banner appears to be wrapped around a rectangular column, with a separate base.

Materials and surface:

- The surface has a marble-like white texture with subtle gray veining, suggesting a smooth, glossy finish on the banner and a matte finish on the pedestal base.

Base design:

- The pedestal base is dark (black) with a contrasting display panel featuring additional text and a smaller logo. The base also has a slogan or tagline in colored lettering.

A 11"
₹ 1130

WOOD & METAL COMMEMORATIVE OBELISK

Model
WM 9920

Overall form:

- A tall, freestanding obelisk-like plaque with a rectangular cross-section and a broad, tapering top. It stands on a wide, multi-layered base.

Surface material and texture:

- A light-colored marble-looking surface with subtle veining. The finish appears polished.

Top feature:

- A large, gold star mounted on the upper front face, oriented slightly to the left.

Base:

- A multi-tiered pedestal base with a slightly recessed horizontal band near the top and a stepped or layered lower section, giving a solid, substantial look.

Structural features:

- The monument consists of a main tall panel mounted on a sturdy pedestal, with the star affixed to the top, suggesting a commemorative or promotional plaque. The monument appears to be designed for indoor display, with a smooth, angular modern appearance.

A H
₹ 1175

WOOD & METAL STAR-ASCEND STATUE

Model
WM 9921

Overall form:

- A tall, vertical, sculptural trophy with a slender, curved human figure reaching upward. The figure stands on a rounded pedestal and supports a star-like element at its extended hand.

Material and finish:

- A glossy, gold-toned metallic surface, giving it a polished, reflective appearance.

Pose and silhouette:

- The figure is elongated and elegant, with one arm raised overhead to hold or reach toward a small star-shaped element above. The other arm rests along the torso or hip, contributing to a dynamic, celebratory pose.

Support and base:

- The sculpture is mounted on a cylindrical, dark red pedestal with a multi-tiered base. A rectangular gold plaque is affixed to the front of the pedestal.

Structural features:

- The sculpture has a continuous, fluid form from base to top, with a clearly defined upward reach and a cantilevered star at the apex, suggesting an award or achievement motif.

A 12.75"
₹ 1890

WOOD & METAL ASCENDANT WINGS

Model
WM 9922

Overall form:

- A tall, abstract sculpture featuring a central humanoid figure with outstretched, wing-like elements on both sides, mounted on a multi-tiered pedestal.

Pose and silhouette:

- The figure stands upright with a slender, elongated body. The arms blend into the large, curved wing shapes that arch outward and upward, creating a symmetrical, wings-crescent silhouette.

Material and Finish:

- A smooth, highly reflective gold-colored surface, giving a polished, metallic look.

Central figure details:

- The head is simple and rounded, atop a long neck that transitions smoothly into the torso and legs. The figure's form is streamlined and minimalistic, with no distinct facial features.

Wings:

- The wings are broad, curved, and taper toward the tips, forming crescent-like shapes on both sides of the figure. They appear as an integral continuation of the body rather than separate appendages.

Structural features:

- The piece is a commemorative trophy or award sculpture, designed to convey achievement and ascension, with a stable base and a soaring, winged central figure.

B 13"
₹ 2270

WOOD & METAL STAR-ASCEND STATUE

Model
WM 9933

Overall form:

- A tall, upright award trophy with a distinctive pentagonal outline, featuring a curved cutout near the top forming an opening.

Top feature:

- A circular hole just below the apex, inside which is a gold star-shaped figure mounted in the center.

Central silhouette:

- The main body is a vertical panel with a slightly tapered profile, giving a sleek, architectural look.

Material and finish:

- Dark, matte-finish body with a contrasting gold-colored inner panel or plaque insert.

Inner plaque area:

- A gold-toned inset panel with text and a logo; the panel is shield-shaped, framed within the dark overall body.

Base:

- A multi-tiered black pedestal with a flat, rectangular footprint, providing stability and a formal presentation.

Structural features:

- The trophy combines a cut-out arch motif, a central star feature, and a recessed gold plaque, evoking a commemorative or milestone award.

A 10"
₹ 1095

WOOD & METAL RING CHAMPIONSHIP

Model
WM 9935

Overall form:

- A circular or ring-shaped trophy mounted on a base, with an inner circular opening that frames a central star figure.

Top feature:

- A gold star mounted in the center of the inner circle, extending outward slightly.

Outer frame:

- A thick, dark circular ring forming the main silhouette, with a flat vertical profile and a solid, sturdy appearance.

Inner details:

- A pair of gold laurel branches symmetrically arranged along the inner sides of the ring, creating a ceremonial, award-like look.

Plaque area:

- A marigold/golden plaque area on the base.

Material and finish:

- The ring and base appear to be made of a glossy, durable material with a polished finish; the inner star is a metallic gold tone.

Structural features:

- The composition centers on a circular ring containing a star, supported by a pedestal, with laurel embellishments suggesting an award or achievement motif.

A 8.73"
₹ 1395

WOOD & METAL STAR WINDOW

Model
WM 9945

Overall form:

- A tall, vertical handheld trophy or plaque with a rounded top and a curved, cabinet-like silhouette. The piece appears as a single, solid mount with a cutout circular window near the upper portion.

Top feature:

- A circular opening at the very top region housing a prominent gold star figure mounted in the center.

Central motif:

- A large gold star suspended within the circular cutout, giving a focal point near the crown of the piece.

Side embellishments:

- Several smaller stars arranged in a decorative pattern around the central circular window, alternating in color between gold and silver.

Material and finish:

- The main body looks dark, possibly black or dark gray with a glossy or matte texture; the central star and smaller stars are gold and light-colored, creating a strong contrast.

Structural features:

- The trophy combines a circular window with a central star motif and surrounding stars, mounted on a tall, ergonomic plaque-like form, giving a ceremonial or commemorative vibe.

A 7.75"

₹ 780

WOOD & METAL SUMMIT STAR

Model
WM 9950

Overall form:

- A tall, slender trophy with a stylized vertical shaft that tapers upward, culminating in a prominent star at the top.

Top feature:

- A gold/black, five-point star perched on the apex of the shaft. The star appears glossy and well-defined.

Shaft and finish:

- The main column is gold/black with a textured surface, featuring subtle vertical facets that give a tapered, columnar appearance.

Base transition:

- The shaft rests on a rounded gold collar that transitions to a black, multi-level pedestal.

Base:

- A chunky, circular pedestal with a glossy black finish. The pedestal supports a square or rectangular plaque area on one side, which is set at an angle for visibility.

Material and finish:

- The trophy combines metal-like gold components with a dark, matte-to-gloss shaft; the plaque insert is a laminated or printed surface sealed into the base.

Structural features:

- The star atop a tapered column, supported by a sturdy base with an angled plaque, conveying a prestigious, celebratory award.

WOOD & METAL ELEGANT PANEL

Model
WM 9969

Overall form:

- A vertical, freestanding plaque or certificate display mounted on a broad, angled base. The entire piece is shown in a portrait orientation.

Frame:

- A thick, black-colored outer frame surrounds a single large central panel. The frame appears solid and rigid, with a slightly angled back to support upright display.

Central panel:

- A smooth, gold/silver-colored surface forming the main display area. The gold panel is rectangular with a tall aspect ratio.

Decorative ends:

- At the top and bottom edges of the gold/silver panel, there are narrow gold borders with a subtle decorative pattern or embossing. These borders run horizontally and add a touch of ornamentation.

Base:

- The display is mounted on a broad, angled pedestal or stand that provides stability. The base appears to be an extension of the frame, angled to create a slight leaning presentation.

Material and finish:

- The gold/silver panel has a polished, reflective finish; the dark frame and base have a matte or satin appearance, suggesting metal or coated wood.

Structural features:

- The piece is a simple, elegant presentation plaque with ornamental gold accents at the top and bottom, designed to showcase an inscription or certificate within a clean, formal display.

WOOD & METAL EMBLEM CREST

Model
WM 9970

Overall form:

- A desk-top trophy mounted on a broad, rectangular base, with a dark brown front panel that reads like wood or a wood-like material.

Left golden emblem:

- A decorative gold medallion featuring a central star surrounded by a rosette, suspended by a V-shaped connector that attaches to the top of the panel.

Right panel:

- A rectangular plaque (golden foil), framed by a darker frame. It appears to bear a company logo and printed text.

Base and support:

- The whole assembly sits on a wider, stable base, with a yellow accent band along the front of the base.

Materials and finish:

- The main panel looks like polished wood or a wood-like material; the golden elements are metallic; the plaque is metal or painted plastic in gold.

Color palette:

- Dark brown (panel and base), gold for the emblem and plaque, golden foil.

Decorative details:

- The gold emblem combines a central star with a rosette design and an outer border, adding visual richness.

Style:

- Classic recognition trophy design featuring a gold emblem and an institutional logo plaque, mounted on a solid base.

A 9" x
₹ 960

WOOD & METAL CLASSIC CUP

Model
WM 9971

Overall form:

- A two-piece desktop award plaque consisting of a dark wood or wood-like rectangular back panel mounted on a horizontal base with a matching gold accent strip.

Back panel:

- A tall vertical rectangular plaque with a smooth, polished wood finish. The top and edges are rounded, giving a soft, formal appearance.

Emblem on left:

- A gold-toned trophy cup figurine affixed to the left side of the back panel. The cup has two curved handles and a circular medallion motif on its front, creating a classic trophy silhouette.

Base:

- A solid wide base with a matching gold-colored horizontal strip running along the front, providing stability and a contrasting accent to the dark wood.

Materials and finish:

- The back panel appears to be polished wood or wood veneer; the emblem and plate are metallic-looking (gold) with a glossy finish; the base includes a gold accent strip.

Color palette:

- Mahogany for the back panel, gold for the emblem and plate, with a gold strip on the base and a dark red border around the plate.

Overall style:

- Classic, formal commemorative award with a traditional trophy symbol and an inscribed plate.

A 9" x

WOOD & METAL GOLD ROSETTE

Model
WM 9972

Overall form:

- A two-part desktop award plaque mounted on a dark wooden base with a lighter gold-colored horizontal accent along the bottom front edge.

Back panel:

- A rectangular, glossy dark brown wooden plaque with rounded corners, forming the main vertical display.

Left emblem:

- A gold-toned circular rosette medal with radial segments and a flinged outer edge, featuring two hanging tails at the bottom, attached to the left side of the back panel.

Base and trim:

- The award sits on a sturdy base with a gold/yellow horizontal strip along its front edge, creating a contrasting accent.

Materials and finish:

- The back panel appears to be wood with a polished finish; the emblem is metallic gold with a glossy finish; the right plaque is metallic or painted gold, with a colored logo.

Color palette:

- Dark brown for the back panel, gold for the emblem and plaque, red accent around the plaque, and a gold/yellow trim on the base.

Decorative details:

- The rosette emblem has a layered, pleated design; the right plaque features a logo and text area, indicating an acknowledgment.

Style:

- Classic formal award display with a trophy embellishment and an inscribed plaque on a wood-like base.

₹ 960

WOOD & METAL PEACE SIGN EMBLEM

Model
WM 9973

Overall form:

- A two-piece desktop award/display plaque mounted on a rectangular wooden base with a dark brown finish. The piece sits on a longer rectangular plinth or stand, with a gold-colored strip along the front edge of the base.

Back panel:

- A vertical, square-ish wooden plaque with rounded corners and a glossy dark brown surface. It provides a broad display area for two distinct elements on its front face.

Left emblem:

- A three-dimensional gold-toned hand making a peace/V-sign gesture. The hand is sculpted with a shiny metallic finish and attached to the left side of the back panel.

Base and trim:

- The entire assembly rests on a sturdy base at the bottom, with a contrasting gold-colored strip along the front to mirror the color of the emblem and plaque.

Materials and finish:

- The back panel and base appear to be wood or wood-like material with a polished finish; the hand emblem is metallic gold with a glossy coating; the right plaque is metal or high-quality plastic with a gold/yellow finish and printed text.

Decorative details:

- The peace-hand symbol is highly detailed with defined fingers and shading to emphasize the gesture; the right plaque includes a corporate logo and multiple lines of text.

Style:

- Classic corporate recognition trophy with a symbolic hand gesture and an inscribed plaque, designed for display on a desk.

₹ 980

WOOD & METAL GEOMETRIC STAR

Model
WM 9974

Overall form:

- A desktop trophy featuring a dark, angular base supporting a vertical plaque with a gold-colored top emblem.

Base:

- A black-colored, solid base with a slightly flared bottom for stability; the finish is glossy.

Front plaque:

- A rectangular gold/silver plate mounted on the front face of the column.

Column/support:

- A rectangular, slightly widened shaft that raises the front plaque from the base; finished in a glossy black.

Top emblem:

- A gold/silver star mounted on top of the column; the star is metallic-looking with faceted faces to create a three-dimensional reflective surface.

Materials and finish:

- The base and column appear to be rigid, glossy black; the plaque and star are gold-colored with metallic sheen.

Decorative details:

- The star is faceted, giving depth and catch of light; the plaque has logos and inscription blocks.

Style:

- Classic corporate desktop trophy with a central emblem on a plated plaque.

WOOD & METAL STAR CLUSTER

Model
WM 9977

Overall form:

- A desktop trophy with a tall, multi-part design featuring several gold stars perched atop a dark rectangular pedestal.

Top elements:

- A cluster of gold stars arranged in an ascending, sculptural form. The largest star rises at the top, with smaller stars interwoven toward the base of the star cluster. The stars have a polished, metallic gold finish and faceted surfaces that catch the light.

Connecting support:

- The star cluster sits on a small circular or curved gold-toned pedestal that acts as a transition between the star group and the base.

Base:

- A tall, black, rectangular pedestal with a glossy finish, resting on a wide lower plinth. The base provides a stable foundation for the trophy.

Materials and finishes:

- Gold-toned metal for the stars and plaque; dark glossy material (lacquered wood or resin) for the pedestal; a reflective, high-gloss finish overall.

Decorative details:

- The star cluster includes multiple stars of varying sizes, arranged to create depth and a dynamic, celebratory look. The plaque features a corporate-style logo and a dedication inscription.

Style:

- Elegant, award-style trophy with a prominent celestial motif (stars) atop a ceremonial pedestal.

B 11"
₹ 970

WOOD & METAL ASPIRATION STATUE

Model
WM 9979

Overall form:

- A desktop trophy with a tall, slender gold figure, a star at the top, perched on a dark glossy pedestal with a tilted plaque.

Top figure:

- A gold, stylized human figure reaching upward with one arm extended to hold a star. The figure is slender with an angular, abstract design.

Star element:

- A small gold star perched at the highest point, held by the extended arm.

Connecting shaft:

- The figure appears to stand on a tapered, curved support that rises from the base toward the star.

Base pedestal:

- A black glossy rectangular plinth at the bottom, supporting a mid-section plaque and the upper figure.

Materials and finish:

- All-metal or metal-coated (gold/silver-tone) figure and star; the base and pedestal are glossy black plastic or resin.

Decorative details:

- The star is clearly defined, and the figure has a dynamic, aspirational pose reaching for the star.

Style:

- Modern trophy with an artistic, inspirational motif emphasizing achievement and aspiration.

WOOD & METAL ELEGANT STAR

Model
WM 9981

Overall form:

- A tall, angular desk top award with a tapered, upright body and a prominent gold star affixed to the top front edge.

Shape and orientation:

- The award has a tall, rectangular prism silhouette with a slight taper as it rises, giving a wedge-like profile. The gold star is attached at the upper front corner, angled slightly forward.

Top element:

- A large gold star mounted on the top front, oriented with its point upward and slightly to the side, creating a striking focal point.

Material and finish:

- The body appears to be a glossy, lacquered wood with a rich burgundy color; the star is gold-toned.

Base:

- The base is not visible in full, but the design implies a solid, stable bottom that supports the tall, slender upper section.

Decorative details:

- The star has a three-dimensional, beveled edge appearance; the overall look is ceremonial and corporate.

A 8.73"
₹ 960

WOOD & METAL MARBLE PEDESTAL

Model
WM 9982

Overall form:

- A tall, upright award plaque or certificate mounted on a dark, marble-like base. The composition is vertically oriented and narrow, with a clear separation between the light-colored plaque and the darker base.

Plaque surface:

- A light pink to lavender panel with printed elements arranged in a formal layout. The surface shows a few marbling or texture marks, possibly from printing or design.

Base:

- The base is a dark, glossy material with a marble-like pattern comprised of white veining. It provides a sturdy, wide foundation for the tall plaque.

Materials and finish:

- The plaque looks like a laminated or printed panel with a polished, semi-gloss finish; the base is a solid, polished stone or stone-like material.

Orientation and framing:

- The plaque is mounted upright on the base, with the entire assembly photographed at a slight angle, emphasizing its height and the texture of the base.

Aff
₹ 1130

WOOD & METAL HEROIC REACH

Model
WM 9986

Overall form:

- A tall, slim trophy with a gold-toned figure raising a circular emblem overhead, mounted on a dark, multi-faceted pedestal.

Top element:

- A circular, disk-like emblem held aloft by the figure's arms. The disk has a smooth, reflective gold surface with a decorative border.

Figure:

- A stylized, full-body human figure in a standing pose, arms extended straight upward to grasp the disk. The figure is smooth, with a glossy gold finish and simplified muscular detail.

Connecting shaft and base:

- The figure stands on a narrow pedestal that tapers into a broader, square-based black monument. The base includes a separate orange/gold-colored plaque on one side.

Materials and finishes:

- The statue and disk are metallic gold-toned, likely resin or metal with a polished chrome plating. The pedestal is a dark, glossy material. The plaque uses a metallic or enamel-like orange-gold finish.

Decorative details:

- The disk features a decorative raised border; the figure's pose conveys triumph and ascent. The pedestal has a stepped, panel-like design, giving a ceremonial appearance.

Style:

- Classic, celebratory achievement trophy with a heroic, winged-figure aesthetic.

A 14"
₹ 1600

WOOD & METAL CASCADE OF STARS

Model
WM 9987

Overall form:

- A tall vertical award trophy consisting of a multi-star design mounted atop a dark base.

Top motif:

- A series of gold-toned star shapes arranged in a cascading, stacked formation. The stars vary in size and are connected by a central spine, creating a dynamic, ascending look. The largest star sits near the middle/top, with smaller stars extending upward and downward.

Stars and finish:

- The stars have a polished, metallic gold surface with faceted facets that catch light, giving a geometric, angular appearance.

Connecting structure:

- The star chain is attached to a slender vertical column that leads down to the base.

Materials and finish:

- Gold-toned metal for the star chain and top, dark glossy resin or metal for the base, and a printed or enamel plaque with gold lettering.

Decorative details:

- The stacked star motif creates a celebratory, radiant effect, typical of achievement awards.

Style:

- Glamorous, ceremonial trophy with a heraldic star cascade motif.

A 10"
₹ 865

WOOD & METAL TRI-STAR PINNACLE

Model
WM 9988

Overall shape:

- A trophy with a tall, curved base supporting a vertical arrangement.

Base:

- A broad, rectangular pedestal with rounded edges and a dark surface, framed by a yellow border. The surface appears to have a plaque with engraved text.

Main shaft:

- A curved, tapered column rising from the base, giving a sweeping, S-like profile.

Decorative top:

- A vertical assembly of three five-pointed stars, stacked at alternating angles, forming a dynamic, upward trajectory.

Stars:

- Each star is a three-dimensional, metallic gold piece with beveled edges and hollowed or faceted inner faces that catch light.

Color scheme:

- Predominantly gold stars and dark base.

Proportions:

- The trophy emphasizes the star motif, with the star column occupying most of the height and a substantial, sturdy base for stability.

WOOD & METAL STELLAR APEX

Model
WM 9989

Overall composition:

- A trophy with a dark, curved base leading up to a tall, ornate top featuring stars and a gem-like ornament.

Base:

- A rectangular pedestal with a curved, concave front surface. It has a dark blue/purple panel framed by a gold border and gold-accented edges.

Top ornament:

- A prominent gold star design. The star shape is stacked and forms a vertical, dynamic trajectory with multiple points, giving an ascending impression.

Central stem:

- A curved gold stalk that rises from the base, bending gracefully before supporting the star element at the top.

Gem/perch:

- A faceted, diamond-like clear gem sits just below the star assembly, held by a gold mount.

Color scheme:

- Predominantly gold for the star and stem.

Proportions:

- The tall star structure dominates the silhouette, creating a tall, elegant trophy with a strong vertical emphasis.

WOOD & METAL AURORA STARSPIRE

Model
WM 9991

Overall form:

- A tall trophy with a stacked, elegant design culminating in a large geometric star centerpiece.

Base:

- A rectangular black pedestal with a gold-bordered plaque.

Shaft:

- A stacked, featuring a maroon ribbed section that narrows at mid-height and widens toward the top, with a shiny gold band near the junction to the base.

Centerpiece:

- A multi-pointed star sculpture rising above the shaft. The star is gold-toned and consists of interlocking, angular segments forming an intricate three-dimensional starburst.

Additional details:

- A smaller star motif and angular cutouts are visible within the larger star structure, contributing to a layered, crystalline appearance.

Color scheme:

- Gold-toned metal for the star and accents, deep burgundy/purple for the column, black base, and a gold plaque frame.

Proportions:

- The star element dominates the silhouette, giving the trophy a tall, striking presence with a strong vertical emphasis.

₹ 1585

WOOD & METAL ASCENDANT STARBURST

Model
WM 9992

Overall shape:

- A trophy featuring a tall, stacked star motif atop a cylindrical stem mounted on a square base.

Base:

- A black square pedestal with a gold plaque on one side. The base has a gold trim at the bottom edge.

Stem and mid-section:

- A dark, ribbed, hourglass-like column that tapers in the middle, giving a squeezed waist look. A gold band sits where the stem meets the base portion above.

Star assembly:

- Three gold stars mounted in a staggered, ascending arrangement. Each star has a dark interior framed by a gold border. The stars are arranged diagonally, with the largest at the top and a progressively smaller one below, creating a dynamic ascent.

Colors and materials:

- Predominantly gold stars and accents, a black ribbed stem, and a black base with a gold plaque and trim.

Proportions:

- The star cluster dominates the upper portion, giving a tall, multi-tiered silhouette.

A 13"

WOOD & METAL STAR LAUREATE

Model
WM 9993

Overall form:

- A pedestal-style trophy with a tall, decorative star on top.

Star element:

- A large five-pointed gold star mounted upright on a slender stem that attaches to the top of the base. The star has a faceted, angular surface giving it a polished, gem-like appearance.

Support stem:

- A narrow, gold-colored stalk that rises from the center of the base to support the star. The stem and star appear to be integrated as a single decorative unit.

Base:

- A dark, rectangular pedestal with a glossy finish. It features a curved front panel with gold and orange decorative borders and text.

Color scheme:

- Predominantly black base with gold accents on the star, stem, and text, plus orange/gold borders on the front panel.

Proportions:

- The star dominates the silhouette, perched atop a relatively slender stem and a tall, rectangular base, giving a tall, ceremonial presence.

₹ 630

WOOD & METAL CASCADE OF STARS

Model
WM 9994

Overall form:

- A vertical trophy featuring a tall, stylized star motif mounted on a dark rectangular base.

Stars:

- Three gold-colored stars arranged in a cascading, diagonal stack. Each star is dimensional with beveled edges, giving a relief, polished look. The stars appear to be attached to a common central spine or stem.

Central support:

- A slim vertical stem or rod connects the star cluster to the base, providing a sense of upward motion.

Base:

- A tall, dark rectangular pedestal with a metallic gold plaque on the front. The plaque has a two-tone look with a gradient or reflective surface.

Color scheme:

- Predominantly gold stars and accents, with a dark base and a gold plaque insert, plus a multicolor logo area.

Proportions:

- The star cascade dominates the upper portion, with the rectangular base providing stable support and a formal presentation.

A 7.75"

₹ 535

WOOD & METAL HERALDIC STAR

Model
WM 9996

Overall form:

- A tall trophy with a decorative top element, a slender stem, and a square base with a plaque.

Top ornament:

- A large circular ring formed by a twisted, ornate border, featuring a prominent five-pointed star at its center. The star is three-dimensional with sharp facets and a polished gold finish.

Central stem:

- A narrow, elongated neck connects the top ornament to the base. The neck includes a small decorative element below the ring and leads to a broader tapering section that transitions into the base.

Lower decorative features:

- Below the ring, a smaller five-pointed star sits within a shield-like support that expands toward the base, this creates a layered, heraldic look.

Color and materials:

- Predominantly gold/silver/copper-toned metal for the star, ring, and decorative elements, with a black base plate and a brushed gold/plaque.

Proportions:

- The star dominates the top portion, with the circular ring and shield-like feature giving the piece a ceremonial trophy-like silhouette.

WOOD & METAL APEX OF GENIUS

Model
WM 9997

Overall form:

- A tall, gold-toned trophy with a geometric column and an ornate, winged figure atop.

Top figure:

- A stylized eagle or phoenix with extended wings spread upward, sculpted in gold and perched as the apex of the trophy.

Central shaft:

- A tall, multi-faceted prism-like column with angular faces, tapering slightly as it rises, and a faceted surface that catches light.

Connection details:

- The winged figure is attached to a decorative collar that sits atop the column, giving a crown-like transition between figure and shaft.

Base:

- A solid, black rectangular plinth supporting a gold-toned plaque plate.

Color and materials:

- Predominantly gold-tone metal for the eagle, column, and accents; black base.

Proportions:

- The winged figure dominates the upper portion; the geometric column provides height and a structured midsection; the base anchors the piece visually.

WOOD & METAL GLOBE OF LAURELS

Model
WM 9999

Overall form: A tall trophy on a square black pedestal, composed of a base plinth, a blue speckled column, and an ornate upper assembly topped by a globe.

Base and plinth:

- **Lower base:** A small, dark rectangular plinth supporting the main structure.

Main column:

- **Central shaft:** A tall, cylindrical column in a deep blue color with light speckling or glitter, giving a marbled or terrazzo-like appearance.
- **End caps:** Light-colored rings at the top and bottom of the blue column, providing transitions to the upper and lower sections.

Upper assembly:

- **Central column continuation:** A vertical, narrow, gold-toned element rising from the blue column.
- **Decorative wings:** Two symmetrical gold-toned laurel-like wings extend outward and upward from near the top of the central gold column, framing the globe.
- **Globe:** A clear or frosted spherical globe at the apex, with a stylized laurel or supporting structure around it.

Materials and color:

- Gold-toned metal accents for the wings, central column details, and plaque frame.
- Blue speckled column as the main color element.
- Clear/frosted globe at the top.

Proportions:

- The globe and wings form the apex, giving height to the trophy.
- The blue column is the dominant midsection, with gold accents providing vertical emphasis.
- The plaque at the base anchors the piece and provides readable information.
